- Goldsmith, Walter D.**, Magnetic Recording Applications Eng., Ampex Corp., 934 Charter St., Redwood City, Calif. (M)

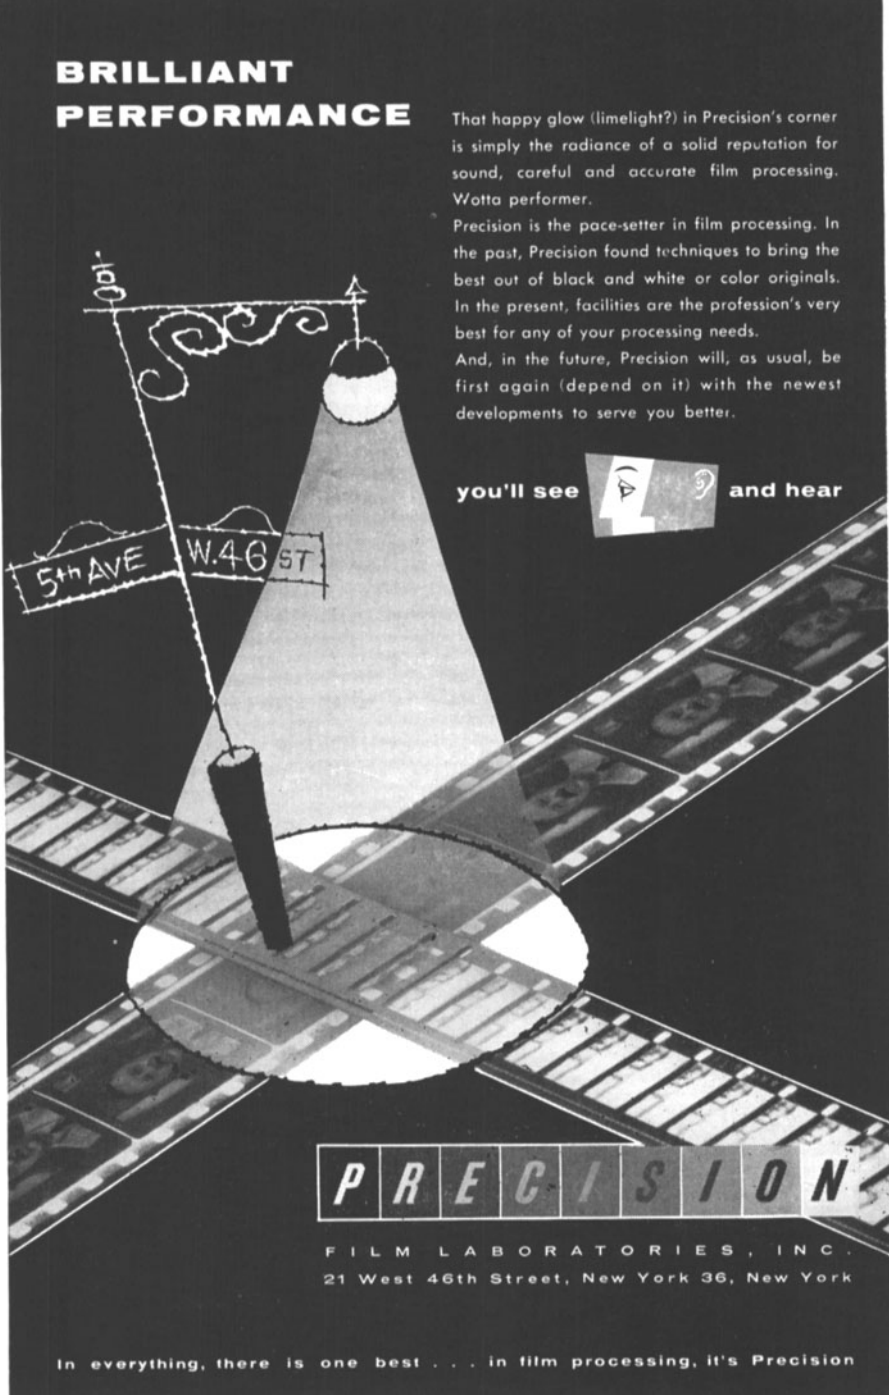

BRILLIANT PERFORMANCE

That happy glow (limelight?) in Precision's corner is simply the radiance of a solid reputation for sound, careful and accurate film processing. Wotta performer.

Precision is the pace-setter in film processing. In the past, Precision found techniques to bring the best out of black and white or color originals. In the present, facilities are the profession's very best for any of your processing needs.

And, in the future, Precision will, as usual, be first again (depend on it) with the newest developments to serve you better.

you'll see  and hear 

PRECISION

FILM LABORATORIES, INC.
21 West 46th Street, New York 36, New York

In everything, there is one best . . . in film processing, it's Precision

why the **ARRIFLEX 16** is the most desirable professional 16mm camera

Because of its features

TRUE MIRROR REFLEX SHUTTER

— not a beam splitting device — passes 100% of the light to film and viewing system intermittently.

FINDER SHOWS BRIGHT IMAGE THROUGH TAKING LENS

— even in poor light. 10X magnification; no parallax; no misframing; accurate, easy follow-focus.

REGISTRATION PIN IN PRECISION FILM GATE

— with balanced rear pressure pad, side pressure rail, cross stages around aperture. This means rock-steady pictures, no film “breathing,” 35mm-like film quality.

THREE LENS DIVERGENT TURRET

— lets you use wide angle lens to 300mm telephoto without physical or optical interference.

INSTANT-CHANGE LENS MOUNT

— with large-flange surface insures positive seating and precise flange focus and alignment.

LARGEST CHOICE OF LENSES

— by famous makers. From 11.5mm extreme wide angle to longest telephoto.

VARIABLE SPEED MOTOR

— electrically driven by light, compact, rechargeable batteries. Motor instantly interchangeable for other types — Governor Controlled, Synchronous and Animation.

TACHOMETER, FOOTAGE AND FRAME COUNTERS

HAND-HELD FILMING

— all these features in a camera so light (only 6½ lbs), so formfitting, with its ingenious Contour Hand Grip, that steady, hand-held filming is easy.

Because of its versatility

It is a hand camera for newsreel and fast action filming

It is a studio camera when you add the 400' Magazine and the Synchronous Motor.

It is a sound camera when you put it in the Arriflex Blimp.

It is also an animation camera, a scientific laboratory camera, a medical camera, a cine-micrographic camera.

You can start with the hand camera, and as your requirements demand, add the special purpose accessories, and yet be able to convert it back to a hand camera in a few seconds — and without the use of even a screwdriver.

Because it is rugged and reliable

Here is a precision camera that can "take a beating" and still deliver the goods.

For instance: Al Milotte, ace Disney wild-life photographer, shot over 90,000 feet for "African Lion" with one Arriflex 16, in the rough tropics.

Disney cameramen found the Arriflex 16 most reliable during the Navy North Pole Expedition in 1954.

Now eight Arriflex 16's are at the South Pole with Disney. Disney Studios has already purchased more than 30 Arriflex 16 cameras—so far.

Because of factory service in the U.S.

A modern, fully equipped service center is maintained in New York City, manned by factory trained technicians. A complete stock of Arriflex parts is always on hand. Because Arriflex owners derive their income through the use of their cameras, service is handled on the promptest possible basis—in most instances within 24 hours.

Because of its reasonable price

You cannot buy another registration-pin 16mm camera unless you pay more than twice as much. If you "doctor up" an ordinary 16mm camera with accessories needed for professional use, it will cost you more than the Arriflex and you still won't have a professional camera, not to talk about the many exclusive Arriflex features.

**ARRIFLEX 16, complete with
Variable Speed (wild) Motor,
Battery Cable, Neck Strap \$1625⁰⁰**

develops reversal film at 1200 ft. per hr.
negative-positive film at 1200 ft. per hr.

**MODEL R-15
REVERSAL FILM
PROCESSOR**

- **EXCLUSIVE OVERDRIVE** eliminates film breakage, automatically compensates for elongation; tank footage stays constant.
- **EASY TO OPERATE**, needs no attention.
- **VARIABLE SPEED DRIVE**, development times from 1½ to 12 minutes.
- **COMPLETE DAYLIGHT OPERATION** on all emulsions, no dark-room needed.
- **FEED-IN ELEVATOR & 1200-FT. MAGAZINE** permits uninterrupted processing cycles.
- **STAINLESS STEEL** tanks, air squeegee, recirculation fittings, air agitation tube, lower roller guards.
- **FORCED WARM AIR DRYBOX**, uses no heating lamps.

- Double Capacity Spray Wash
- Uniform Tank Sizes
- Cantilever Construction
- Size: 76" x 50" x 24"

- Filtered Air Supply
- Self-Contained Plumbing
- Ball Bearing Gearbox
- Weight: Approx. 475 lbs.

Tripod Perfection!

IMPROVED PROFESSIONAL JUNIOR TRIPOD*

ALWAYS A GREAT TRIPOD, the new improved
PROFESSIONAL JUNIOR with the removable head,
now features the following improvements:

1. Simplified camera attaching method with easily accessible knob—no fumbling under camera platform.
2. Adjustable telescoping pan handle—make it longer or shorter to suit you needs.
3. Additional pan handle sockets for left, right or reverse tilt.
4. Larger gripping area and sturdier construction of tilt and pan locking levers.
5. New tie-down eyelets in flange.

And most surprising, there is **NO INCREASE IN PRICE.** See, test, try PRO JR.—you'll never want to be without it.
