

New Members

The following members have been added to the Society's rolls since the April 1960 *Directory*. Also listed are those regretfully reported as deceased since the *Directory*. The designations of grades are the same as those used in the *Directory*. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's *Journal*.

Fellow (F) Active (M) Associate (A) Student (S)

Deceased

James F. Cornell (M) Alfred F. Kleindienst (M) Hollis W. Moyse (F)
 Jay E. Gordon (M) Peter Mole (F) Ronald A. Nieth (A)
 Edward W. Kellogg (H)

ERRATA

The PROCESSALL XR 6-12 roll film processor was developed for complete, automatic, dry to dry processing of photosensitive films or papers. Self threading, automatic temp. control, developing and fixing by submerged spray jets; washing by both water spray and air and by immersion. Low tension scratch free operation. Require 2' x 5' of floor space and minimal plumbing. Once loaded, may be operated in normal room light. Film capacity to 12" wide to 400 ft. long.

The Mark 16/35 film processor is a semi-portable, automatic, continuous film processor for standard temperature or hot solution processing of 16 & 35 mm Motion picture, Microfilm, or any negative or positive film. This equipment is designed for daylight processing. The processor develops and fixes the film by spray immersion, washes by spray impingement and dries film by forced, circulating hot air impingement and is capable of processing speeds up to 3000 feet per hour. It accepts 16 or 35 mm. film, without an adjustment. Common-sense design reduces to a fraction the maintenance, space and manpower. Mark 16/35 was proven under the most rigorous government conditions.

The Baldwin Reflection Densitometer

Used in conjunction with the single-cell Photometer M.N.D., this easily operated instrument gives an accurate measurement of B.S. diffuse density.

The Baldwin Transmission Densitometer

Also for use in conjunction with the single-cell Photometer M.N.D., this typically precise Baldwin instrument is designed for the measurement of transmission density to B.S. diffuse density.

The infallible eyes

As the techniques of photometry and densitometry become more and more complex, the comparison between prints or negatives cannot rest on the judgement of the human eye, however well experienced. Today, the unvarying accuracy of Baldwin instrumentation is needed.

PHOTOMETRY TODAY CALLS FOR BALDWIN PRECISION

Write for Brochure JMP/117 containing details of the complete Baldwin range.

Pan-American Films

735 POYDRAS STREET, NEW ORLEANS, LA., JACKSON 2-5364

SURVEILLANCE

AT 250,000 FEET!

Sharp-clear-steady motion pictures under extreme environmental conditions.—Up to 50 G's acceleration in all three axes.—Down to -65°F operating temperatures.—Will operate while subjected to extreme vibrations.

D. B. M. 3A 100 FT. MODEL

Up to 400 f.p.s. using intermittent movement with register pin.
 High resolution and picture steadiness is retained, even at top speed!
 There is no side weave, no picture jump, and no darkened frame line.
 This instrumentation footage can be spliced to your documentary films with no loss in quality.
 Visit our booth (#28) during the 5th International Congress on High Speed Photography.

TEL-Animastand® with Electronic Zoom

ANIMATION and SPECIAL EFFECTS CAMERA STAND

Greatest Value in the Low Cost Field!

Installations throughout the world! Embodies features of photo enlarger, movie camera, micrometer, railroad roundhouse, and all movements associated with much higher priced stands. Optical effects such as pans, angles, zooms, cartoons, titles, quick closeups and every variation for trick photography and art work can be easily produced with precise registration. A camera fitted to a moveable counterbalanced vertical carriage photographs the artwork. Takes even the heaviest 16mm or 35mm camera (Acme with stop motion motor illustrated).

Includes four Veeder Root counters which calibrate 18" north/south movement, 24" east/west travel, and zoom movements to the Art Table or Cell Board. Ideal for Motion Picture Producers, Animators, Special Effects Laboratories, TV Stations, Advertising Agencies, Art Depts., Etc.

Electronic Zoom Control

Features:

- Adjustable Dynamic Braking.
- Constant Motor Torque at any speed.
- Instant Response at any position.
- Infinite Variable Speeds.

Basic Title Stand.....	\$1495
Basic Stand with Compound.....	\$2995
Basic Stand, Compound, Electronic Zoom.....	\$3740
Electronic Zoom....	\$ 750
