

Repair-Testing & Modification
of **OPTICS**

From World's Largest
"LENS BANK"

WHATEVER your PHOTO-OPTICAL problems
TESTING — REPAIR — MODIFICATION
— COATING — COLLIMATION, ETC., — B & J
can provide you "OFF-THE-SHELF" ACTION!

ALL WORK UNCONDITIONALLY GUARANTEED.

RESEARCH OPTICAL ASSEMBLY LAB solves your special custom lens problem! Our precision grinding, rigid testing, custom mounting and lens coating are speedily done by expert craftsmen to meet the specific requirements of such companies as Ford, R.C.A., G.E., A.E.C.

OUR NEW PHOTO OPTICS 63rd ANNUAL CATALOG—WRITE FOR FREE COPY.

"See-Thru" 16mm
Pathe

NEW
CINE REFLEX
CAMERA

For best results you must look directly through the shooting lens! That's why "See-Thru" Pathe' is so ideal with Long Telephoto Lenses .. where Viewfinders are not practical! Lenses up to 80" focal lengths are available for the new "See-Thru" Pathe'

- Continuous Reflex Viewing! No Parallax!
- Variable Shutter—180°—to Totally Closed (Signalled)!
- Variable Speeds — 8 to 80 Frames Per Sec.!
- Motorization Provision!

New Members

The following members have been added to the Society's rolls since the April 1960 Directory and those listed in the September, November and February Journals. Also listed are those regrettably reported as deceased since the February listing. The designations of grades are the same as those used in the Directory. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's Journal.

Fellow (F)

OPTICAL ENGINEERS

For almost half a century Fairchild Camera and Instrument Corporation has been pioneering and developing airborne photographic systems, instrumentation and equipment, and has become a leading contributor to the nation's airborne intelligence gathering capabilities.

The recent merger of DuMont Military Electronics with Fairchild marks the creation of a new order of integrated systems capability, which now embraces virtually all types of data collection, transmission, reduction, storage and retrieval. Expanded product areas encompassing line of sight and scatter communications, radar, military television, fiber optics, large area displays, electronic test and ground support equipment, integrated mapping systems, target simulators,

and high acuity aerial cameras, provide opportunities to participate in some of today's most vital fields of scientific development.

Senior opportunities currently exist for engineers and physicists experienced in optical systems design and optical image evaluation to handle top level assignments in our photographic, display and scanning systems programs.

Openings exist at both the Syosset, Long Island and Clifton, New Jersey locations.

You are invited to submit a resume of your professional experience in confidence to: Mr. J. McCauley, Box 9, Fairchild Camera and Instrument Corporation, #5 Aerial Way, Syosset, L.I., New York.

New!

SUPER BALTAR* LENSES

...featuring today's highest resolution for wide screen, television and photo instrumentation

This new Super Baltar line of matched motion picture lenses complements and expands the famed Baltar series to include 70 mm coverage. And it balances illumination, flattens the field, and heightens contrast like no lens you've ever seen! You get high picture fidelity from corner to corner, edge to edge, of the film frame—dependable result of the most critical optical characteristics ever built into a professional lens. Features include: minimum back focus of 32 mm; choice of mounts, barrel or custom focusing, to meet your specific needs; seven focal lengths, from 25 mm to 9", optically centered to full aperture; 70 mm coverage with 3", 4", 6", and 9" lenses.

Write for Technical Publication F-162, Bausch & Lomb Incorporated, 72217 Bausch St. Rochester 2, N. Y.

**Trademark Bausch & Lomb Incorporated*

Revolutionary new Mitchell R-35 Reflex Studio Camera features new Super Baltar Lenses—in special focusing mounts designed by B&L in collaboration with Mitchell engineers.
