

JOURNAL OF THE

SMPTE

- 485 A Standard for Positioning the Vacuum Guide in Transverse Track Video-Tape Recorders
• A. H. Lind
- 489 Time-Base Errors and Their Correction in Magnetic Television Recorders • Aubrey Harris
- 494 Cablefilm Equipment • C. B. B. Wood, S. H. Padel and Peter Rainger
- 498 A Damping Device to Improve the Image Sharpness and Steadiness of Prints Made on a
Continuous 16mm Motion-Picture Printer • Gerald M. Seeley
- 500 A Constant-Time, Variable-Intensity Microsecond Exposure Sensitometer • Frank P. Herrnfeld
- 502 Establishing and Maintaining Printer Light Color Balance in Additive Color Printing by a
System of Controlled Chance • Pablo Tabernero
- 509 Some Uses of Optical Masers in Photography • J. S. Courtney-Pratt
- 512 Applications of the Type C5 Rotating Mirror Framing Camera
• K. R. Coleman and A. Skinner
- 515 What Is the Sensitivity of a Photographic System? • Fred H. Perrin
- 522 A Kerr-Cell Camera With Synchronized Light Source for Millimicrosecond Reflected Light
Photography • George A. Theophanis
- 527 Electronic Image Intensification: Image Intensifier Using Cathodo-Conductivity
• R. A. Chippendale and J. R. Folkes
- 533 Recommended Practices and Standards:
Recommended Practice RP 8, Safe Title Area for TV Transmission
Proposed American Standards: PH22.37, Dimensions for Raw Stock Cores for 35mm Motion-Picture Film;
PH22.127, Magnetic Coating of 16mm Magnetic-Photographic Sound Record
American Standards: PH22.3, 35mm Photographic Sound Motion-Picture Film Usage in Projector; PH22.43,
16mm 3000-Cycle Flutter Test Film, Photographic Type; PH22.51, Intermodulation Tests for 16mm Variable
Density Photographic Sound Prints; PH22.56, Nomenclature for Motion-Picture Film Used in Studios and
Processing Laboratories (Section 1-4)
- 542 Toronto Convention Report

90th SMPTE Convention • October 1-6 • Lake Placid Club, Essex County, N. Y.
