# REDUCE SCREEN LIGHT LOSS

*with modern, first surface*

## TUFCOLD DICHOIC REFLECTORS

The light reaching your screen must be reflected by the lamphouse mirrors, therefore brilliancy of your pictures is dependent directly upon the condition of your reflectors.

Using TUFOLD reflectors, projected light is reflected from the front surface without passing through the glass twice, as with second surface mirrors.

*See your dealer now for the size you need or write for data on sizes for all lamps.*
