INTER-MIX WITH A PRESTO SPLICER

Hercules Model

RESULT — ONE DEPENDABLE MONEY-SAVING REEL

Editing/splicing/intermixing assorted film into one reel is a money-saving system when you use a Prestoseal Hercules splicer. With speed, dependability and precision built in every Prestoseal butt-welding splicer, it's perfect for any type of film base of any standard thickness in motion pictures and microfilm sizes 8-35mm and magnetic film or tape 1/4-1". Transparent, specially-coated tape, 1/10" wide, bridges butt splice through electrical fusion . . . splice can outlast film itself. Splicing speed is achieved through one-stroke loading of transparent tape and fusing cycle of 2 1/4 seconds. Butt ends are welded in accurate lateral alignment.

Consistent reliability has been proved in hundreds of Prestoseal Splicer installations at microfilm labs and archival centers, recording studios, motion picture darkrooms, and data processing bureaus. Specified in GSA and Air Force contracts for many years.

Write for descriptive brochure covering complete line of equipment, including rewinds and consoles.

Custom splicers for any material or width.
