

JOURNAL OF THE

SMPTE

- 649 Optimum Focusing of Space Camera Systems • *Louis S. Herczeg*
- 654 The Double Knife-Edge Technique for Improved Schlieren Sensitivity in Low-Density Hypersonic Aerodynamic Testing • *William A. Stolzenburg*
- 660 Magnetic Recorders Improved for 70-db Signal-to-Noise Ratio
• *D. P. Gregg and Keith O. Johnson*
- 663 Thermoplastic Recording: A Progress Report • *W. E. Glenn*
- 666 Thermoplastic Recording Tape Systems • *Norman Kirk*
- 669 Visual Titrimetric Determination of Phenidone and Hydroquinone in Photographic Developers
• *K. R. Reitz and C. D. Anselm*
- 671 A New Reversal Print Material for a Color Production System
• *Deane S. Thomas, Jr., Herbert L. Rees and Robert C. Lovick*
- 675 Cinemicrography Applied to the Study of Dye Transfer From Relief Matrices
• *A. G. Tull and R. J. Stevens*
- 678 Technique for the Examination of Contact Area of Magnetic Tapes • *John G. Streiffert*
- 681 Motion Pictures and Sound: The Problems and Solutions in the Bell System Ride
• *David A. Mintz*
- 684 Approved American Standards: PH22.4-1965, Dimensions of 35mm Motion-Picture Reels;
PH22.9-1965, Specifications for Camera Usage of 16mm Motion-Picture Film Perforated
Two Edges
Withdrawal of American Standard: PH22.89-1958, Scene-Change Cueing for Printing
16mm Motion-Picture Film
- 686 Résumés — Resumenes — Zusammenfassungen
- 689 Canada's National Film Board — A Revised Reprint • *Gerald G. Graham*

98th SMPTE Technical Conference • Oct. 31–Nov. 5 • Queen Elizabeth Hotel, Montreal
