

# New Members

The following members have been added to the Society's rolls since the June 1964 Directory and the April 1965 supplemental listing. Also listed are those regrettably reported as deceased since then. The designations of grades are the same as those used in the June 1964 Directory. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's *Journal*. The members listed below complete the Society's roll as of June 30.

Active (M) Associate (A) Student (S)

Deceased: Harry Bontekoe (M) John N. Briton (M) C. J. LeBel (M)  
Clyde A. McCrork (A)

- Ackermann, Rand D.**, Sr. Res. Asst., 961 Scaife Hall, University of Pittsburgh, Pittsburgh 13, Penna. 15213 (A)
- Ahern Lloyd G.**, Dir. of Photog., Columbia Pictures Corp. Mail: 2920 Gilmerton Ave., Los Angeles, Calif. (A)
- Allison, Dee**, Bookkeeper, Behrend's Inc. Mail: 1527 N. Sedgewick St., Chicago, Ill. 60610 (A)
- Amore, Thomas Cecil**, Chf. Engr., Rockhampton Television Ltd., Box 568 P.O., Rockhampton, Aust. (A)

## Gryphon Air Squeegees

Model  
HB-2

PATENTED

70MM  
\$150

35MM  
\$100

16MM  
\$100

Uses high pressure compressed air (10-20 psi) to form a high velocity air cushion that prevents film contact and completely eliminates water spots.

Custom fabricated of photographic grade stainless steel — no gaskets, cements, or other materials — completely safe with chemicals.

Easy to adjust and maintain — nothing to wear out.

**Use the Quiet Running AURICON  
16mm Sound-On-Film Camera...  
NEVER DISTURB THE AUDIENCE WITH CAMERA NOISE!**

Does the scene above look familiar? You may be interested to know more about its significance relative to your sound recording needs.

Here is Auricon Professional 16mm Motion Picture Sound Camera Equipment, operating right in the middle of an audience — actually within inches of the surrounding spectators! Yet, despite the complex precision mechanisms that are recording a full-color picture and every whispered word of the speaker on the rostrum, not even a murmur of distracting camera noise is heard by the audience. This quiet, dependable recording of 16mm Sound-On-Film Talking Pictures is the special engineering "magic" of Auricon!

Except for the red signal lights glowing on the Auricon Sound Camera, the audience has no way of knowing that the Camera is running. In fact, even the click of the on-off switch has been muted!

Auricon Cameras are versatile and easy-to-handle because there is no bulky, sound-proof enclosure "blimp" such as all other 16mm cameras use when recording sound.

Professional Producers and Cameramen choose Auricon to shoot pictures synchronized with Optical or Magnetic "Double-System" recording equipment, or to record "Single-System" sound on the same film taking the picture. Write us about your sound recording equipment needs today!

All Auricon Cameras are sold with a 30 day money-back guarantee. You must be satisfied!

World's smallest  
Mercury Xenon Lamps  
for miniaturized equipment  
—made in U.S.A.!

**T**HE widest line of the world's smallest Xenon, Xenon-Mercury and Mercury Lamps. Made in America by Hanovia, brightest name in compact arc lamps. Every one features:

- High intensity
- High brightness
- Full spectrum
- Long life
- Complete reliability
- Rapid starting
- No maintenance

Perfect for solar simulation, lasers, instrumentation, photo-chemistry, communications. All operate DC, AC, pulsed, simmer-flash or modulated; from 80 to 5,000 watts. One universal starter fits all Hanovia compact arc lamps. And remember: only Hanovia makes the lamps and all associated equipment such as electrical controls and power supplies. Write for technical data today.

## ARRIFLEX at work — ONE OF A SERIES\*

### ARRIFLEX® is astronomer's aide at Kitt Peak National Observatory

High on a rock-bound mountain peak in Tucson, Arizona, is the Kitt Peak National Observatory, site of the world's largest solar telescope. The magnificently modern research center is operated by AURA, The Association of Universities for Research in Astronomy, Inc., under contract with the National Science Foundation. Absorbed in current research projects are astronomers from the leading universities, the observatory's own Photography Department and its Arriflex 16mm Motion Picture Cameras.

"We're presently using the Arriflex 16 to photograph 'seeing' conditions, or air mass turbulence, in our new 84" telescope, fifth largest in the world," explained John H. Lutnes, head photographer at Kitt Peak. "We have the Arriflex mounted on a special bracket on the cassegrain focus of the telescope, which in turn is focused on the limb of the moon for illumination, and imaged past a knife edge onto film—a process similar to Schlieren photography."

"The projected black and white film displays an image of the 84" mirror as background, over which is seen a distorted wave front within the telescope and housing dome. We can separate the slower moving turbulence inside the dome and the more active turbulence outside the dome by exposing the film at approximately 12 FPS."

"We selected the 16mm Arriflex for several reasons... versatility, dependability, compactness, ruggedness, and the innumerable accessories available," Lutnes added. "In scientific research the quality of equipment often determines an experiment's qualitative results."

Qualitative results... criterion for research centers throughout the world... is the criterion for Arriflex too. And a major reason why cinematographers in the exacting fields of science and research depend on an Arriflex.

**ARRIFLEX CORPORATION**  
**OF AMERICA**  
257 PARK AVENUE SOUTH, NEW YORK, N. Y. 10010

"THE ARRI STORY"—An absorbing 32 minute color sound film depicting the step by step manufacture of Arriflex precision cameras and their applications to varied cinematographic assignments. Available without charge for group showings. Write (on letterhead, please) Arriflex Corporation of America for bookings.

F&B/CECO Offers You a Year's Supply  
of Mylar Splicing Tape  
Just to Try Our New AUTOMATIC

# GUILLOTINE PERFORATING TAPE SPLICER

**Q. How economical is the GUILLOTINE SPLICER?**  
A. GUILLOTINE SPLICERS use non-perforated tape which costs only \$2.15 a roll, as compared to \$11.00 a roll for perforated tape. Save up to a nickel per splice.

**Q. How fast does GUILLOTINE splice?**  
A. GUILLOTINE makes splices 35% faster than conventional pre-perforated tape splicers, because you don't have to fumble with sticky tape, placing it over the sprocket teeth.

**Q. How strong is a GUILLOTINE splice?**  
A. GUILLOTINE SPLICER splices are far stronger because the act of perforating the tape bonds the Mylar to the film.

These are facts which you can easily prove by using the GUILLOTINE SPLICER. Other facts which you should know are that you can make butt, overlap, or diagonal splices on film or sound recording tape. You can rebuild torn sprocket holes and you can repair damaged film without losing frames.

That's why GUILLOTINE is easier, faster, more reliable, and the most economical film splicer on the market today.

Send your orders to

**F & B / C E C O** I N C.  
315 West 43rd Street, New York, N. Y. 10036

or any of the following branches nearest you.

FLORIDA: 51 East 10th Avenue, Hialeah  
CALIFORNIA: 6446 Santa Monica Blvd., Hollywood  
WASHINGTON, D.C.: 1314 Powhatan Street, Alexandria, Virginia

F&B/CECO is so convinced that every film producer, every person who handles film, should up-date his splicing with GUILLOTINE, that we are willing to make the following offer:

FREE with each purchase of one GUILLOTINE SPLICER we will give you...

1. Ten rolls of Mylar splicing tape (a normal year's supply).
2. An unconditional Money-back guarantee, return the splicer and get your money back—keep the tape.

ADDED ATTRACTION to make it even easier for you, we will give you a \$50.00 Trade-in allowance on any non-perforating HFC or Rivas tape splicer.

Announcing a new edition of

## Principles of COLOR SENSITOMETRY

Revised by an SMPTE committee headed by Dr. Francis H. Gerhardt

This essential book devotes chapters to:

- Sensitometric exposures
- Processing of sensitometric tests
- Quantitative evaluation of image density
- Densitometer design principles
- Transformations between integral and analytical densities
- Applications of color sensitometry and interpretation of sensitometric results
- Statistical aspects of color sensitometry

\$4<sup>00</sup>

Discounts of 20% to SMPTE Members on single copies.  
Less 25% to all purchasers on orders of 5 through 49; 33 1/3% on orders of 50 or more. In New York City, please add 4% sales tax.

Address your order to **SOCIETY OF MOTION PICTURE AND TELEVISION ENGINEERS**

9 East 41st Street, New York 17, N. Y.

# F&B/CECO Slashes EASTERN RENTAL PRICES!

Years ago there was a reason why Eastern Rental prices were much higher than those of the West Coast. The reason simply, that there was much more production in California, and equipment got more rentals—earned more money per year.

In recent years, New York and Florida have emerged as major film production centers. So, it makes sense to us now, that we can, at long last, reduce our rental prices to match those now prevailing in California.

Our new rental catalog, just off the press, reflects this new idea, so you will find hundreds of price changes, all lower!

We have also decided to apply some rules of logic to our new pricing system—and have corrected what we felt were inequities, and illogical pricing.

But price reductions are not the whole story at F&B/Ceco. We also offer:

- 1 The largest stock of rental equipment in the world.
- 2 The best maintenance and repair shop in the country, insuring that you will get only top-notch, like-new equipment, always in perfect working condition.
- 3 Fastest and most efficient service anywhere, with plenty of equipment to back up any you rent and plenty of technicians to provide expert advice and immediate service.
- 4 Exclusive new equipment available nowhere else; BNC, NC and Standard Mitchell Reflex cameras, hospital-zone quiet 1500 amp generators, new helicopter anti-vibration camera mounts, exclusive new and accurate camera power supplies and remote controlled wireless sync systems.
- 5 Camera cars, location trucks, portable dressing rooms. Anything and everything for location shooting, plus the world's largest inventory of lighting equipment—perfectly packaged to travel.
- 6 And—at Myerberg Studios, Stage 54 West Inc. in New York and F&B/Ceco Florida Studios, as well as any other studios where the equipment is supplied by us, YOU PAY ONLY FOR WHAT YOU USE.

**Clearly, your best deal is with F&B/CECO, INC.**

If, for some reason you have not yet received your new F&B/Ceco Rental Catalog, please write or phone. It will be in the mail immediately.
