**NOW—16MM
THEATRE-
QUALITY
PICTURES**

The
**NEW "MIGHTY MITE"
 XENON ARC LAMP**

projects the maximum amount of steady high intensity, pure daylight white light (6000° Kelvin) 16MM film can withstand. Screen illumination is approximately eight times that obtained from incandescent sources and twice than obtained from the new, lower powered, enclosed arc sources.

Easy mounting on all 16mm projectors presently using carbon arcs and some equipped with incandescent.

FAITHFUL REPRODUCTION OF COLOR

Ideal for sparkling bright

BIG SCREEN PROJECTION EVEN IN ROOMS WHICH CANNOT BE DARKENED

Operating costs are about the same as for carbon arcs which project an equal amount of light. The bulb has a life expectancy of over 2,000 hours. No moving parts to wear out. No dirt or carbon soot to adversely affect reflector efficiency. The "Mighty Mite" System, in any of three available wattages, 450, 900 or 1600, includes the lamphouse, silicon transformer-rectifier power supply and bulb.
