

James L. Davis has been appointed Sales Manager, Studio, Theater and Television Lighting, Photolamp Div., Sylvania Electric Products Inc., 730 Third Ave., New York, N.Y. 10017. Announcement was made by Richard H. Hodges, Sales Manager Industrial/Commercial, who also announced the appointment Fred H. Freeman as New York area Studio, Theater and Television Specialist. Mr. Davis has been with Sylvania since 1957. In his new post he will be responsible for coordinating all of the marketing activities in the studio, theater and television lighting fields.

New Members

The following members have been added to the Society's rolls since the July 1968 Directory. Also listed are those regretfully reported as deceased since then. The designations of grades are the same as those used in the July 1968 Directory. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's *Journal*. The members listed below complete the Society's roll as of September 6.

Active (M) Associate (A) Student (S)

Deceased: C. S. Ashcraft (F) Millard W. Baldwin, Jr. (F) Walter E. Dunn (A)

Brown, Richard P., Supervisory Engr., B&H Airline Products Div., 360 Sierra Madre Villa, Pasadena, Calif. 91109 (M)

A STAR IS BORN
FILMLINE'S MODEL FE-50
A Processor for Ektachrome Film
Processes 16mm Color Emulsions at 50 FPM.

Model FE-50
FROM
\$22,500
F.O.B.
Milford, Conn.

Who knows more about building film processors than Filmline? Nobody. And everything we've learned has gone into our newest Ektachrome processor, the FE-50. It is top quality equipment at a sensible price . . . the result of Filmline's productive know-how. Designed and engineered to fulfill the requirements of both large and small TV stations the FE-50 is the most versatile, fully automated Ektachrome processor ever built.

■ **EXCLUSIVE OVERDRIVE SYSTEM** — guarantees against breaking or scratching film. The system is so sensitive that film can be held man-

ually while machine is in operation, without breaking film or causing lower film assemblies to rise. Provisions for extended development to increase ASA indexes to 250 and higher are incorporated. Machine threadup allows use of standard ASA indexes or accelerated indexes because of Filmline's Film transport system features.

- **EASY-TO-OPERATE**—automated controls make this an ideal machine for unskilled personnel.
- **VARIABLE SPEED DRIVE**—speed range of 5 FPM to 60 FPM for Ektachrome emulsions.

Now available: Filmline FE-30 Ektachrome Processor. Speed — 30 FPM. Complete with Replenishment System . . . \$15,750. F.O.B. Milford, Conn.

For more details write: SN-68

ADDITIONAL FILMLINE FEATURES:

■ Stainless steel air squeegee ■ Impingement dry box ■ Torque motor for takeup ■ Leak-proof pumps for chemical solutions ■ Temperature controlled by precision thermistor controllers ■ Construction — all metal ■ Tanks and component parts are type 316 stainless steel.

Recent FE-50 Installations: WEAT-TV, WCKT-TV, WMAL-TV, NBC, CBS, WTOP-TV, A-1 Labs, Precision Labs, Film Service Lab.

Suppose you need to see a sequence of pictures within seconds after you make the exposure.

But you are in a remote location.

You have no facilities or means to process conventionally.

You might do it easily with new Kodak Bimat Transfer Film.

Difficult data-collection problems are everyday fare at Kodak. Photography is extremely adept at gathering and recording data that escape other methods.

KODAK BIMAT Transfer Film is an example. Still under development for its total potential, but already able to serve well in situations such as the one illustrated here. The oceanographer needs his positive pictures (and negatives) just minutes after releasing the shutter. He gets both simultaneously with a system using KODAK BIMAT Transfer Film. He knows he has his data before leaving the surface area.

Fast, convenient, dependable. Qualities you expect from Kodak. Now applied to the advancing sciences.

You may not need to study the ocean floor. But, if your needs include data collection where the location is remote, when conventional processing is impossible, and playback of sequential information is needed immediately, you might do it easily with new KODAK BIMAT Transfer Film.

To learn more about new KODAK BIMAT Transfer Film and how it might serve you, or to learn if some other problem you face might respond to a Kodak solution, use the coupon below.

OXBERRY®

35/16mm
Master Series

ANIMATION STANDS

Model 5442

Now with NEW OFF-CENTER ZOOM

Our recently published 8 page article describing the "whys and wherefores" of an Animation Stand is now available. Send for your copy today. Write on company letterhead.

Optical diagram of off-center zoom
Dotted lines show how center shifts as camera carriage is raised or lowered. Amount of center shift for a given zoom can be accurately preset.

Features:

- Automatic focus with N/S, E/W compound lens mount for off center zooms
- Zoom range 30 to 3 field
- Electronic zoom
- Rackover camera, fixed pin registration movement
- Receives 16mm components
- Automatic dissolve 8 to 120 frames
- Remote operated reticle projection system
- 6 speed stop motion motor
- 4 peg track table top with N/S, E/W rotating compound with pantograph and platen
- Counters and controls on all movements
- Wide range of accessories including electronic compound controls, floating platen and peg assembly
- **Underneath Aerial Image Projector**
- 16mm and double frame 35mm components
- Rigid construction
- Overall height 11'4"
- Weight 1700 lbs
- Base 48"x56" deep

ARRIFLEX at work — ONE OF A SERIES

Gerald Hirschfeld A.S.C., camera operator Dick Kratina and the derelict in subway car set.

Hand-Held **ARRIFLEX® 35** Films **THE INCIDENT** A Tour-de-Force in New Filming Techniques

"New wave"; "cinema verite"... call it what you will... today's young film craftsmen are pursuing new patterns in cinematography with a vigor that amounts to a crusade.

What they're striving for is honesty—stripping the gauds and trappings from film-making, using the camera, not as a medium, but as an extension of the viewer's senses, to involve him fully in the emotional turmoil of what's happening.

How do you do it? Ask Gerald Hirschfeld, A.S.C., Vice President of MPO Videotronics. He directed photography for 20th Century-Fox's award-winning film, "The Incident." This tense and bitter drama shot in a New York subway, is a perfect case-in-point of the filmic approach.

Hirschfeld's camera for the subjective shots, was the Arriflex 35. "I wanted to get empathy here," he says. "I wanted everyone who saw the film to literally taste the fear and desperation of those trapped people. I

wanted to get all of the harshness of light, the hard bitterness of the hoodlums, and the isolation of each character in his own non-involvement. And, I wanted to get the real feeling of the subway—the sharp jolts, the screeching curves, the jarring and swaying.

"I needed a camera that was light and mobile enough to be hand-held, yet optically well-designed for accurate reflex composing. It had to load quickly and respond to every demand, without needing a careful of back-up equipment."

New ideas mean new challenges, new demands... and every one yields new proof of Arriflex superiority. No wonder it's the one camera film pioneers prefer, almost unanimously. Try an Arriflex yourself, next time, and find out why.

ANOTHER **SOS** EXCLUSIVE

BRAND NEW

16mm-16 FRAME

EDGE NUMBERING MACHINE!

THE INCOMPARABLE MOY... WORLD FAMED FOR QUALITY, RELIABILITY & EASE OF OPERATION

FEATURES:

- ★ Prints visible, consecutive edge numbers every 16 frames, equivalent to one foot of 35mm film
- ★ Accepts 16mm A and B wind film without any adjustments
- ★ Operating speed of 60 feet per minute
- ★ 2000 foot capacity
- ★ Completely automatic operation—numbers are printed in-between perforations
- ★ Counter records total 16 frame sequences numbered

Meet the mixer with the mostest—

priced from only \$300 with 6 inputs and 3 controllable outputs — that's E-600 by Electrodyne. It's ready to go in any application from high-quality recording through CATV to sound reinforcement. Rack-mounted or completely self-contained in its own handsome Teak cabinet. E-600 comes with 6 mike or line inputs, each with speech/music select switch. All three outputs — Line, Headphone, and Auxiliary — have their own independent level controls.

Thanks to integrated-circuit, plug-in electronics and Electrodyne design, frequency response is 20 Hz to 20 kHz ± 1 db. Maximum output is +30 dbm; distortion less than 0.5%.

There's an illuminated VU meter with multiplier, along with a built-in oscillator for level set. The fully-regulated power supply can be paralleled for fail-safe battery operation, and the headphone jack can be paralleled for an additional output.

ELECTRODYNE CORPORATION
7315 Greenbush Avenue • North Hollywood • Calif. 91605

Principles of COLOR SENSITOMETRY

Revised by an SMPTE committee headed by Dr. Francis H. Gerhardt

This essential book devotes chapters to:

- Sensitometric exposures
- Processing of sensitometric tests
- Quantitative evaluation of image density
- Densitometer design principles
- Transformations between integral and analytical densities
- Applications of color sensitometry and interpretation of sensitometric results
- Statistical aspects of color sensitometry

\$4⁰⁰

Discounts of 20% to SMPTE Members on single copies. Less 25% to all purchasers on orders of 5 through 49; 33¹/₃% on orders of 50 or more.
