**NEW!**

**DAYLIGHT  
CONVERSION**

**DICHROIC  
FILTERS**

A revolutionary, patented dichroic, developed specifically for color TV and movie film production. Highly accurate, converts incandescent and quartz light to 5600° Kelvin—a perfect simulation of daylight! The patented process enables the high efficiency interference filters to function by reflection, instead of conventional heat absorption.

*The revolutionary features include:*

- ★ Transmission of 85% corrected light available (much higher than previously obtainable)
- ★ Complete stability—Color temperature will not vary with age or heat
- ★ Normal operating corrected Kelvin color temperature of 5600°
- ★ Construction of Pyrex glass with sturdy steel frame
- ★ Fully safe and easy to clean
