national Video Corp., 675 Almanor Ave., Sunnyvale, CA 94086. He was formerly Director of Engineering for TNT Communications. In his new post he will be responsible for customer services applications, engineering and training.

Larry Nelson has been appointed TV Technical Manager of the West Coast Division of Century Lighting, 3 Entin Rd., Clifton, NJ 07014. In his new position he will provide technical and sales services for Century in 11 Western States and in Hawaii and Alaska.

New Members

The following members have been added to the Society's rolls since the August 1969 *Journal*. Also listed are those regrettably reported as deceased since then. The designations of grade are the same as those used in the July 1968 Directory. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's *Journal*. The members listed below complete the Society's roll as of August 15.

The Directory for Members, Part II of the July 1968 *Journal*, shows the geographic membership distribution by states included in the Sections.

thrust power.

Start with a unique thrust-bearing between yoke and lamp housing that lets you maintain tension once you've set it, even as you constantly rotate the light. But, then, we've got the answer to everybody else's mini. Compact housing that gives you more clearance for greater rotation in yoke. Insulated, heat-resistant adjustment knobs that spell the end to annoying finger burns. And, spring-

loaded hinges on each of four barn doors that ban "creep," and let you adjust them individually for positive lighting control and sharp edge cut-off. The versatile MINI-MAC 1000 is a high-intensity, continuous-duty light source designed for TV and motion picture studio use. The tungsten-halogen "quartz" lamps operate directly on 120 or 230 volts. And, it is available

with a wide variety of individually engineered accessories to fit your exact needs and specifications. Unique. There's no other mini like it on the market today. You're the one we have to please . . . Write for complete detailed product information on the MINI-MAC 1000 (and 650). Bauer's new Selection II0 is the permanent installation projector that has everything. It's the ideal projector for schools, screening rooms, studios, advertising agencies and industrial and business installations that can't gamble on quality.

From one of the world's largest manufacturers of professional equipment, the Bauer Selection II0 offers the most brilliant illumination possible, with a Xenon lamphouse accommodating 450, 900 or 1600 watt lamps.

Its Geneva (Maltese Cross) Movement and automatic "oil bath" lubrication mean steadier, smoother running projection and more positive film protection. And its 5000 foot capacity allows some 2½ hours of uninterrupted film run.

The Selecton II0 doesn't stint on sound quality, either. A built-in solid state pre-amplifier assures high fidelity sound from both optical and magnetic tracks.

All this, plus human-engineered push-button controls and a range of precision projection lenses from 25mm to 75mm. Prices start at \$4,125.

Also studio models with single and double (16/16) band operation, programmed push-button control... full line of accessories.

Allied Impex Corp., 168 Glen Cove Road, Carle Place, N. Y. 11514
 Chicago, Dallas, Los Angeles.

The best thing yet in a big package.

Bauer

WE SELL PROTECTION.

Don't let our name fool you. It's a 'front' for a whole gang of 'protectors.' All hard as nails. All able to take good care of you wherever you go.

Like plastic reels. In all sizes and kinds. For 8mm, Super 8, 16mm, 35mm, 1/4" tape, and video tape. Tape cassettes, too. All real tough stuff.

And Plio-Magic plastic cans to hold our plastic reels (plus storage boxes for Technicolor-type film cartridges).

Likewise Plio-Magic shipping cases for films, filmstrips and

Fairchild-type film cartridges.

Also film cores for 8mm, 16mm, 35mm, 70mm and 105mm. And Reel-Pak self-enclosing reels for 8mm, 16mm, Super 8 and microfilm. And idler rollers for 8mm, Super 8, Double 8, 16mm, 32mm, 35mm and 70mm.

We even make linear polyethylene ball-bearings, with ground-glass balls.

So, if you know what's good for you, you'll send for our complete catalog. Or call us.

Or else.

Auricon 16mm Sound-On-Film Cameras run
QUIET AS A CANDLE FLAME!

The Auricon Camera is unique, with noiseless operation as silent proof of precision design. It runs so quietly that no heavy and cumbersome external blimp (sound-proof enclosure) is required! For fast "set-up" and dependable filming of professional 16mm talking pictures, Producers and Cameramen choose Auricon to shoot pictures synchronized with Optical or Magnetic "double-system" recording equipment, or to record "single-system" sound on the same film taking the picture.

All Auricon Cameras are sold with a 30-day money-back guarantee. You must be satisfied!
