

107th Technical Conference and Equipment Exhibit

April 26–May 1

Drake Hotel

Chicago

107th Program Chairman **Leonard F. Coleman**, Eastman Kodak Co., Oak Brook, IL, has announced that plans for the Conference have begun to take shape. Although it is still early for papers to have been submitted and cleared, indications are that the Chicago Program will be a varied and interesting one.

In addition to the regular Program, a two-day Symposium on Production, Control and Use of Films for Television is scheduled for Thursday and Friday of Conference Week. Following the successful format of the 106th Symposium on Super 8mm film, the Chicago Symposium will bring together experts in the production and use of films for television. The two days of concentration on a single topic, it is hoped, will bring out some of the major difficulties in the area of telecine production and perhaps offer some practical solutions.

Arrangements Chairman **Denis H. G. Howe**, Technicolor Film Service, 1333 Argyle St., Chicago, IL 60645, reports that there have been several meetings with the members of his committee in order to coordinate activities and he hopes that the early planning will pay off with a smooth running Conference in April.
