TDA2D VIDEO/PULSE DISTRIBUTION AMPLIFIER

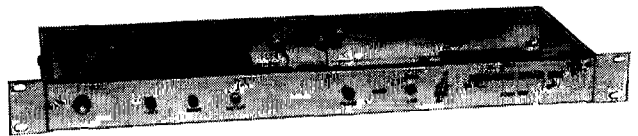

The now-famous TDA2 Distribution Amplifier, in use at most television stations and networks, has a recently added feature. The "D" stands for Differential Input, which we added to the TDA2. And not only did we add a differential input, we subtracted \$30.00 from the price. Instead of \$325.00, we're selling the new, improved TDA2D for \$295.00 F O B Nashville. The compact TDA2D fits neatly into 1 3/4" of panel space and produces virtually no heat.

MODEL TPC2 TRANSISTORIZED BURST PHASE CORRECTOR

The TPC2 permits rotation of the color burst phase signal driving a TV transmitter, without the necessity for extensive transmitter investigation and possible modification. It permits advancement or retardation of the color burst by 20 degrees, without affecting the amplitude or other characteristics of transmission. This completely transistorized unit has its own internal regulated power supply, and is constructed on a 1 3/4" by 19" panel. \$575.00 F O B Nashville.

608 Norris Ave. • Nashville, Tenn. 37204 • Ph.: (615) 254-3365

TC1 CLAMPING AMPLIFIER

The TC1 Clamping Amplifier employs tip clamping to remove low frequency signal deficiencies without disturbing burst and other chrominance information in or about back porch levels. The clamped stage utilizes a field effect transistor driven by a balanced bridge circuit. This advanced design technique produces highly effective and stable clamping. The TC1 Clamping Amplifier sells for \$325.00 F O B Nashville.

TBG2 BLACK BURST GENERATOR

The brand new TBG2 Black Burst Generator allows you to go black and back with perfection. The TBG2 has two outputs available for added versatility, and each has burst phase and burst amplitude adjustments so the two feeds can be matched under any condition. The TBG2 has the industry's only continuously rotatable phase control, and is accurate to within one degree. All the controls are on the front panel and can be locked. The unit is small, compact and lightweight. So is the price . . . \$475.00 F O B Nashville.
