transistorized hand unit for complete control of zoom motor

NEW! smooth ZOOM MOTORS for ANGENIEUX 12-120 and ZEISS 10-100 Vario Sonnar

The popularity of zoom lenses is due to their versatility and potential for more imaginative camera work. Both features are considerably enhanced by the addition of a zoom motor.

We are pleased to offer two specially designed Electro Zoom Motors for the Arriflex 16SB and 16MB cameras. One each for use with the Zeiss 10-100 Vario Sonnar and the 12-120 Angenieux zoom lenses. They are mounted without tools or lens modification. Split clamp mounts do the trick in moments.

Each zoom motor comes with a fully transistorized hand unit that controls all functions—stop, start, direction and speed. Infinitely variable and smooth from 5 to 50 seconds across a 10X zoom. Operation from regular Arriflex 8 volt battery or from any DC source of 5 to 16 volts.

The precision, reliability and dependability you have come to expect of Arriflex equipment are built into these two Electro Zoom Motors. They're available now at all authorized Arriflex dealers. See them!
