The 76 Series Optical Bench is described and illustrated in a booklet available from National Camera, Dept. QR, 2000 W. Union Ave., Englewood, CO 80110. The optical bench is constructed of an aluminum rectangular hollow beam with a heavy wall section. A hard anodized aluminum bar is mounted at the center of the top surface to provide lateral alignment and a clamping surface for the accessory optical mounts.

Memorex Recording Tape is described in an 8-page illustrated brochure available from Memorex Corp., Consumer Products Div., P.O. Box 420, Santa Clara, CA 95052. The brochure contains photomicrographic illustrations of various tapes.

Quartz-D lights, Softlights, Link System, Vari-Flector and the Lowel-Light with barndoors are illustrated and briefly described in a leaflet available from Lowel, 421 W. 54 St., New York, NY 10019.

RCA Corp.'s videotape equipment is described in illustrated booklets contained in a packet available from RCA Communications Systems Div., Front and Cooper Sts., Camden, NJ 08102. The equipment des-

cribed includes the Time Code Editor and two videotape recorders, the TR-70C reel-to-reel machine and the TCR-100, which employs a cartridge format. Other leaflets and booklets in the packet describe the HTR headwheel panel, TV cameras, antennas and an OB van supplied to Yugoslavia.

The dc Power Supply Selection Guide in a revised and updated version is available from Hewlett-Packard, 1601 California Ave., Palo Alto, CA 94304. Both general-purpose and special-purpose power supplies are listed by voltage and current in tabular form. The tables include performance data and operating features. Outline drawings with dimensions are also included.

Catalog pages on lighting equipments are available from Mole-Richardson Co., 937 N. Sycamore Ave., Hollywood, CA 90038. Separate sheets are available on the following items: Focusable Molequartz, Solarspots, Molettes, Nooklites, Broads, Softlites, Molefays, Molepars, Cyc-Strips, Scoops, Kits, Stands, Adapters/Hangers, Accessories, Special Effects, Grip Equipment, Power Equipment and Books.

The Spindler & Sauppe Product Summary is an 8-page catalog containing descriptions and illustrations of audiovisual equipment. Equipment described includes programers and other equipments including various models of Selectroslides. The catalog is available from Spindler & Sauppe, Inc., 130034 Satocoy St., North Hollywood, CA 91605.

Bauer introduces
the P6 Studio:

AN ADVANCED DOUBLE-SYSTEM 16MM SOUND PROJECTOR.

You know what a double-system projector can do for you. The P6 Studio, with its advanced-design 16mm projector and hi-fi magnetic recording deck interlocked on one portable chassis, can do it better!

Use it to assure perfect lip sync; as a preview and editing projector for TV and theatre screenings; as a multi-lingual projector and 25-watt portable sound studio!

The P6 Studio also offers you: Optical-magnetic playback and magnetic record on the film deck; magnetic record-playback on edge track or center track on the audio deck. Sound-on-sound. Sound transfer. Synchronous motor. And much more!

Bauer P6 Synchron. Sync motor for critical TV work. For synchronizing with tape recorders. Manual threading. Optical playback, magnetic record-playback.

Bauer P6 Automatic 300. Super-quiet and super-bright. Uses the G.E. Marc-300* lamp (almost 4 times brighter than conventional tungsten lamps). Optional change-over device permits continuous showing of any length film.

Bauer P6 Automatic. A superb A-V projector. Self-threading, with optical playback, magnetic record-playback. Sound-on-sound facilities.
