

The Plio-Magic® Freight-Watchers

(They'll cut your shipping costs 40%)

With recent and proposed increases in postage and shipping charges you should be looking for a way to cut film handling costs.

Lightweight Plio-Magic reels, cans and cases are the answer. We can cut your shipping costs 40%.

How? By tipping the scales at less than 40% of what metal and fiber containers do.

For example. A 1200-foot metal reel (with film, can and shipping case, ready-to-go) weighs about seven pounds. Or, in terms of your pocketbook, a ton.

A Plio-Magic 1200-foot reel (with film and shipping case, ready-to-go) weighs only about four pounds. Or about three pounds less than its metal counterpart.

Think of the savings. On our three pound example alone you would save \$3.84 if you sent your film first class. Now multiply that by ten thousand cases a year. Breathtaking, isn't it?

Of course, we wouldn't ask you to sacrifice protection just to save money. Not by a long shot. Our Plio-Magic reels, cans, and cases defy abuse absolutely. Drop one and watch what happens. Nothing. No dents. No chips. No scratches. No damaged film. Nothing.

In other words, Plio-Magic offers you better protection than metal, reduces your shipping expense and costs less to begin with.

Now what could be better than that?

If you'd like information on our complete line of film handling equipment, send for our catalog.
