

Fall Technical Conference — Los Angeles — October 22-27

The technical program and equipment exhibit are responsibilities of Editorial Vice-President R. E. Putman and Conference Vice-President Harry Teitlebaum, with Hollywood Section Chairman Anthony D. Bruno responsible for all arrangements. The first and major appointment is:

Dr. Frank P. Brackett, Jr., Chairman
112th SMPTE Technical Program
c/o Assn. Motion Picture and TV Producers, Inc.
8480 Beverly Blvd.,
Hollywood, CA 90048

Dr. Brackett will welcome all general suggestions for the program he will present and especially looks forward to specific technical papers offered by members.

Tentative plans include a two-day symposium on cable television. The format of recent SMPTE semiannual conferences has been that of concurrent sessions on numerous motion-picture and television subjects on Monday, Tuesday and Wednesday, with a symposium held on Thursday and Friday, usually without concurrent sessions on other subjects.

The Equipment Exhibit is open from Monday evening through Thursday afternoon.

10th International Congress on High-Speed Photography Group Inclusive Tour

Announcement by **Carlos H. Elmer**, U.S.A. Delegate

The Group Inclusive Tour to the 10th International Congress on High-Speed Photography at Nice, France, will begin on September 18 and extend through October 3. There will be stopovers in England and Germany en route to France,

then in Spain. The Congress will be held in Nice, September 25-30.

Arrangements and Departure

The tour has been arranged by American Express and Pan Am for a group of no less than 15 persons and no more than 50. (Mr. Elmer, who was Chairman of the 9th International Congress on High-Speed Photography at Denver, will lead the tour.)

The tour will leave in two groups, one from Los Angeles and the other from New York. The two groups will combine in London and will continue as one group from that point. Members are warned that the tour may soon be booked to capacity and a standby listing may become necessary. Reservations are handled by American Express Co., Travel Div., 3003 North Central Ave., Phoenix, AZ 85012 (or inquiries can be directed to Mr. Carlos H. Elmer, 6620 E. Cholla St., P.O. Box 875, Scottsdale, AZ 85252).

Although the tour touches four countries in two weeks, it has been designed for a fairly leisurely pace with an added attraction consisting of a stopover at Cologne on the first day of Photokina. A visit to the beautiful island of Mallorca, near Barcelona, is planned for the last day of the tour.

In London the two groups will meet at the Royal Lancaster, the J. Arthur Rank skyscraper hotel fronting on the vast green expanses of Hyde Park. To participate in the tour a person need not be a member of SMPTE or of any other organization.

Tour Itinerary

Sept. 18 — Departure by Pan American flights in two groups (Los Angeles and New York) for London. Both flights arrive on the morning of September 19.

Sept. 19-21 — In London, which will be the site of the 11th Congress in 1974, time will be generally free for shopping and sightseeing. It is possible that one or more field trips to technical facilities in or near London will be arranged.

Sept. 22 — The tour will leave London for Cologne and will transfer by chartered bus for Aachen, Germany. The afternoon will be spent sightseeing in Aachen, historic residence of Charlemagne and site of the crowning of German Emperors until 1531. This is also a major health spa, featuring "the hottest springs in Central Europe." Stay at the Kurhotel Quellenhof.

Sept. 23 — A chartered motor coach will take tour members for a full day at Photokina in Cologne. This will be the opening day of the "World's Fair" of photography with an immense exhibition of equipment and photographic exhibits housed in more than a dozen huge halls. The tour will return to Aachen for dinner. Breakfast and dinner are included in the tour arrangements at Hotel Quellenhof.

Sept. 24 — The tour will proceed by air from Cologne to Nice. In the afternoon tour members will check in at Congress headquarters and obtain programs, badges, etc. The group will stay at Hotel Westminster during Congress Week.

Sept. 30 — After the closing of the Congress the group will fly from Nice to Barcelona, Spain, and will stay at the Regencia Colón Hotel.

Oct. 1 — In Barcelona tour members may see a bullfight or may prefer sightseeing and shopping.

Oct. 2 — The last day in Europe will be enhanced by an excursion to the beautiful island of Mallorca — a short trip by Iberia jet from Barcelona.

Oct. 3 — The Pan American 707 jet leaves Barcelona at midday for New York, via Lisbon, arriving at Kennedy airport in the afternoon. The Los Angeles group will make a connection to get into Los Angeles early in the evening.

The tour from New York is priced at \$595 and from Los Angeles at \$723. The price is based on double occupancy of hotel rooms and includes roundtrip economy air fares. Continental breakfast is included at all hotels and also dinner at Aachen. Transfers from airports to hotels, tips and the handling of one piece of luggage are included in the cost of the tour.

The Money-Makers

FILMLINE'S professional color film processors for motion picture laboratories.

The Filmline Models FE-30 and FE-50 are fast, foolproof, troublefree and long-lasting. They turn out consistently superior work. The design is backed by Filmline's reputation as the world's leading manufacturer of film processors for the motion picture laboratory industry.

Now enjoy the benefits of professional equipment incorporating exclusive Filmline features that have paced the state-of-the-art in commercial, industrial and defense installations at a cost lower than processors offering less.

Check the exclusive Filmline features below:

MODEL FE-50:
16 mm Color Processor
for Ektachrome Film. Speed
50 FPM. **\$22,500**

MODEL FE-30:
16mm Color Processor for
Ektachrome film. Speed 30
FPM. **\$16,400**

● **"FILMLINE OVERDRIVE FILM TRANSPORT SYSTEM"**

This marvel of engineering completely eliminates film breakage, pulled perforations, scratches and operator error. The film can be deliberately stalled in the machine without film breakage or significant change of film footage in solutions. The heart of any film processor is the drive system. No other film drive system such as sprocket drive, bottom drive or simple clutch drives with floating lower assemblies can give you the performance capability of the unique Filmline Overdrive Film Transport System.

● **"TORQUE MOTOR TAKE-UP"** gives you constant film take-up and does not impose any stress or strain on the film itself. Completely independent of the film transport system. This FILMLINE feature is usually found in professional commercial processors but is incorporated on the FE-30 and

FE-50 models as standard equipment. Don't settle for less!

● **"TEMP-GUARD"** positive temperature control system. Completely transistorized circuitry insures temperature control to well within processing tolerances. Temp-Guard controls temperatures accurately and without the problems of other systems of lesser sophistication.

● **"TURBO-FLOW"** impingement dryer. Shortens dry-to-dry time, improves film results, and carefully controls humidity content of your valuable (and sometimes rare) originals. Immediate projection capability is assured because the film dries flat without the usual curl associated with other film processors.

● **"ZERO DOWN TIME"** The reputation of any film processor is only as good as its reliability. The

combination of the exclusive and special added Filmline features guarantees trouble-free operation with absolute minimum down-time and without continual operator adjustments. Recapture your original investment in 2 years on maintenance savings alone. Filmline's "Push the button and walk-away processing" allows inexperienced operators to turn out highest quality film.

● **"MATERIALS, CONSTRUCTION AND DESIGN"** All Filmline machines are constructed entirely of metal and tanks are type 316 stainless steel, heliarc welded to government specifications. The finest components available are used and rigid quality control standards are maintained.

Compare Filmline features to other processors costing more money. Feature-by-feature, a careful evaluation will convince you that Filmline offers you more for your investment.

Additional Features included in price of machine (Not as extras).

Magazine load, daylight operation ■ Feed-in time delay elevator (completely accessible) ■ Take-up time delay elevator (completely accessible) ■ Red brass bleach tank, shafts, etc. Prehardener solution filter ■ Precision Filmline Venturi air squeegee prior to drybox entry ■ Air vent on prehardener ■ Solid state variable speed D.C. drive main motor ■ Bottom drains and valves on all tanks ■ Extended development time up to two additional camera stops at 50 FPM ■ Pump recirculation of all eight solutions thru spray bars ■ Temperature is sensed in the recirculation line ■ All solutions temperature controlled, no chilled water required ■ Built-in air compressor ■ Captive bottom assemblies assure you constant footage in each solution ■ Change over from standard developing to extended developing can be accomplished in a matter of seconds ■ Impingement dryer allows shorter put through time

Partial listing of Filmline Color Installations: — NBC- New York, NBC- Washington, NBC- Cleveland, NBC- Chicago, CBS & ABC Networks, Eastman Kodak, Rochester.

Laboratories: De Luxe Labs, General Film Labs (Hollywood), Pathe-Labs, Precision Labs, Mecca Labs, Color Service Co., Capital Film Labs, Byron Film Labs, MGM, Movie Lab, Lab-TV, Technical Film Labs, Telecolor Film Labs, Guffanti Film Labs, A-One Labs, All-service Labs, NASA Cape Kennedy, Ford Motion Picture Labs.

TV Stations: WAPI-TV, WHP-TV, WMAL-TV, WXYZ-TV, WWL-TV, WMAR-TV, WJXT-TV, KETV-TV, WTOP-TV, WEAT-TV, WCKT-TV, WAVE-TV, WAVY-TV, KTVI-TV, WCPQ-TV, KTAR-TV, WSYR-TV.
