the best.

CBS Laboratories new Video Processing Amplifier is an outstanding performer! For monochrome or composite color restructuring, CBS Laboratories CLD 1300 is the universal amplifier. High quality restoration is accomplished through individual controls of video, chroma, reference burst, sync and blanking.

In helical or quad tape use, the CLD 1300 actually improves quality dramatically. And the CLD 1300 can even be used simultaneously as a standby sync generator. From CBS Laboratories, of course.

CORPORATION

340 FORDHAM ROAD, WILMINGTON, MASS. 01887 (617) 658-5410

At **DSC**® we would like
to sell you test slides
... but we can't!

It's against "Company Policy"

"Company Policy" states that the accuracy and integrity of DSC test materials must be beyond question—that DSC slides incorporate current industry standards—that DSC slides only be distributed on a lease basis and that they be analysed regularly and substandard slides removed from circulation.

When you think about it, our "Company Policy" is in your company's interest.

- Simple display for fast efficient line up
- Dye images of telecine slides have similar spectral characteristics to programming materials
- Economical — supplied on lease basis
- Free replacement — broken or damaged slides replaced at no cost.

When in Toronto, visit our new Laboratory by the International Airport.

For more information, please contact

DSC Test Slides,
D and S Corley Limited,
80 Galaxy Boulevard, Unit 3,

the best.

CBS Laboratories Mark III Image Enhancer is preferred by most TV stations. Because it sharpens both vertical and horizontal detail automatically. And improves picture resolution as well as color fidelity. The Mark III, with unique "crispended-comb" filter, separates chrominance from luminance, providing sharper contrasts with more defined picture detail. Available for all monochrome and color cameras. From CBS Laboratories, of course.
