

it's **IDI** for:

RENTALS

Film and video people working in the Southeastern U. S. and the Caribbean areas are depending more and more on IDI for the equipment and supplies they need. Our Rental Catalog lists over 500 items and if you don't have a copy, all you need to do is ask. Our experienced staff knows your problems. If we don't have everything you want, we'll try to find it for you somewhere . . .

SALES

Almost all the items in our Rental Catalog (and more) are also available for sale, new and/or used. We cover underwater, helicopter, studio, portable, and high-speed operations. We include Arri to Mitchell; Ampex to Sony; AKG to Vega; Angenieux to Zeiss; Elemack to Scorpion; Arrivox to Nagra; and even include some products of our own design and manufacture.

SERVICE

Keeping all this equipment running at concert pitch takes a little doing and that's where our service people come into the picture. They are some of the most knowledgeable people in the industry. If there's anything they don't know how to fix, they know where to find out. Call us. We're ready before you are.

24 hour, 7 day service at IDI.

the characteristics affect the reproduced sound. He explained how the tracks are recorded and printed and how the cross-modulation test is made and used as a means of quality control for optical sound. Thomas Peterson of Motion Picture Sound assisted Mr. Vincent in answering questions from the audience on optical soundtracks and sound in general. — David W. Kennett (Secretary-Treasurer), Ohio Bell Telephone Co., 100 Erieview Plaza, Cleveland, OH 44114.

CHICAGO, 12 June — The meeting was held in the Marriott Motor Hotel with an attendance of 42 members and guests. The speaker was Mike Tallent, Design Engineer with Video Systems, Inc., Santa Clara, Calif. Mr. Tallent demonstrated the Video Systems Time Base Corrector and Synchronizer. The Time Base Corrector can convert the signal from a helical video recorder to an NTSC interlace. The Synchronizer permits a non-sync incoming signal to be synchronized with other

input signals. — Byron L. Friend (Secretary-Treasurer), Telecine Film Studios, Inc., 100 S. Northwest Hwy., Park Ridge, IL 60068.

NASHVILLE, 20 July — The 17th Annual Summer Film Festival, sponsored by the Nashville Section and Memphis State University, was held in the University's Student Activities Building. The speakers were Wilton R. Holm, Vice-President and Executive Director for the Research Center of the Association of Motion Picture and Television Producers, Hollywood; James Wong Howe, Director of Cinematography, Hollywood; Ken Knaus, Eastman Kodak representative; Ken Rees, producer of documentaries for WMC-TV and a member of the faculty of Memphis State University's Speech and Drama Dept.; and Anton Wilson, columnist ("Cinema Workshop") for *American Cinematographer* and head of Anton Bauer, a firm which designs and manufactures batteries for motion-picture cameras.

New Members

The following members have been added to the Society's rolls since the August 1974 *Journal*. Also listed are those regretfully reported as deceased since then. The designations of grade are the same as those used in the March 1974 *Directory for Members*. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's *Journal*. The members listed below complete the Society's roll as of August 30.

The *Directory for Members* shows the geographic membership distribution within each Section.

An engineer's camera.

"You don't have to be an engineer to understand the basic engineering concepts behind the ACL." The speaker is Eric Falkenberg, Technical Executive, Eclair Corporation of America.

"Take simplicity. More than any single principle, it typifies the design philosophy of the Eclair ACL.

Absolute minimum of parts in ACL magazine provides silent, blimpless operation, even when microphone is placed close to camera.

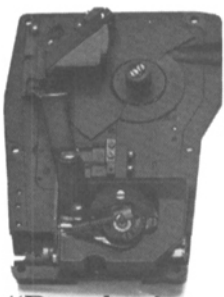

wear, fewer parts to cause trouble.

"In theory, a simpler design means less noise. Fewer parts mean fewer noise sources. Using modern noise-suppressing materials and techniques, ACL has bridged the gap between theory and practice! Simplicity even affects power consumption. With a film path that produces less friction—requiring less power to drive a length of film.

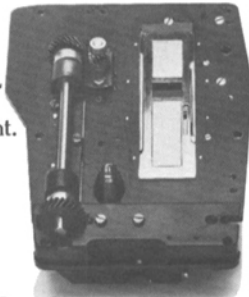

"There are many more advantages ACL's simplicity provides. But the best way to evaluate them is to try one. Then, you'll simply sell yourself!"

Crystal-controlled Hall-effect brushless motor requires only 0.8 amperes.

For the name of your nearest Eclair dealer, or a copy of our fact-filled brochure, write or call Eclair Corporation of America, 62 West 45th Street, New York 10036 (212) 869-0490 or 7262 Melrose Avenue, Los Angeles, California 90046 (213) 933-7182.

Front and rear of ACL aperture plate, with entire camera movement. Extreme simplicity provides maximum efficiency, quiet and reliability.

"But that's just the start. Inside the ACL
