

it's **IDI** for:

RENTALS

Film and video people working in the Southeastern U. S. and the Caribbean areas are depending more and more on IDI for the equipment and supplies they need. Our Rental Catalog lists over 500 items and if you don't have a copy, all you need to do is ask. Our experienced staff knows your problems. If we don't have everything you want, we'll try to find it for you somewhere . . .

SALES

Almost all the items in our Rental Catalog (and more) are also available for sale, new and/or used. We cover underwater, helicopter, studio, portable, and high-speed operations. We include Arri to Mitchell; Ampex to Sony; AKG to Vega; Angenieux to Zeiss; Elemack to Scorpion; Arrivox to Nagra; and even include some products of our own design and manufacture.

SERVICE

Keeping all this equipment running at concert pitch takes a little doing and that's where our service people come into the picture. They are some of the most knowledgeable people in the industry. If there's anything they don't know how to fix, they know where to find out. Call us. We're ready before you are.

24 hour, 7 day service at IDI.

ments for cable system signal leakage (unwanted radiation from cable systems) and field testing of alternate methods that may provide additional protection in this area. Chairman of the CTAC Executive Committee is Hubert J. Schlafly; the Executive Secretary is Armig G. Kandoian.

Location San Francisco, a 24-page directory for film producers, is available from the Film

Coordinator, San Francisco Convention and Visitors Bureau, 1390 Market St., San Francisco, CA 94102. The directory lists names and addresses of production facilities (including equipment rental companies, screening services, sound recording studios, and other facilities), talent agencies, guilds and unions, historical sites and other items of general interest as well as information specifically for film producers.

New Members

The following members have been added to the Society's rolls since the March 1974 *Directory For Members*. Also listed are those regretfully reported as deceased since then. The designations of grade are the same as those used in the *Directory*. An up-to-date list of the *Sustaining Members* appears on the outside back cover of each month's *Journal*. The members listed below complete the Society's roll as of June 12.

The *Directory For Members* shows the geographic membership distribution within each Section.

How much do you want to know about BOLEX 16 PRO?

I'd like to know more about:

THE MAGAZINE

- Coaxial for 400' reels or cores.
- Compact light and inexpensive
- Sprocketless design for quick loading
- Footage counters for each chamber
- Rear-mounted for optimum mobility

FILM THREADING

- Fully automatically in 3 seconds
- Fully automatic film take-up in 400' magazine
- Signal light tells when camera is ready to shoot
- Light signals when empty
- Built-in cutter for removing partially exposed film

MOTOR DRIVE

- Crystal controlled for sync sound filming
- One electronically controlled motor for all filming needs
- Variable speeds 16 to 50 fps; 16-100 fps models available
- Forward and reverse
- Single frame filming
- Instant start and stop—no blank frames between scenes

SOUND

- Double system at 24 or 25 fps
- Super quiet—no blimp needed
- Wireless synch sound shooting with accuracy ± 1 frame per 1,000 feet
- Automatic slating lamp
- Single system sound model available

FILMING AUTOMATION

- Fully automatic exposure control
- Variable speed power zooming
- Variable speed power focusing
- All controls built into handgrips
- Manual over-rides on all controls
- Remote control possible for all functions

EXPOSURE CONTROL

- Automatic, through-the-lens
- Manual over-ride
- Film speeds of 12 to 1600 ASA
- Meter coupled to camera speed control
- f-number visible in viewfinder
- Audible signal when insufficient light

LENSES

- Wide range of zoom lenses
- Extreme wide angle lens
- Rugged bayonet mount
- Lens controls coupled to servo motor
- Silent operation of powered lens controls
- Shock-absorbing rubber lens shade

VIEWFINDER

- Practically flickerless mirror shutter reflex viewing
- Camera stops without mirror blackout
- Possibility of right or left-eye viewing
- 20X magnification
- Instant change from ground glass to clear glass
- TV and 16mm frame markings
- Can be rotated 45, 90, and 180 degrees
- Indicates f-stops
- Remote viewing possibility

FILM TRANSPORT

- Very low pressure required at pressure plate
- High-precision single tip claw transports and registers film
- Superb picture steadiness better than 0.1%

POWER PACK

- 12V rechargeable battery
- Plug-in electronic modules
- Plug-in crystal synch controls
- Outlets for connecting tape recorder, time lapse units and other accessories
- Choice of powerbelt or powerpack
- Signal light on camera shows condition of battery
- All of the above

BOLEX 16 PRO

If, in addition to information, you'd like a demonstration of the Bolex 16 PRO, write Paillard Incorporated, 1900 Lower Road, Linden, New Jersey 07036. We'll notify you when we'll be in your neighborhood.

Our tape-to-film-transfers are better than the tape.

The present state of the art in Tape-To-Film processing is years ahead of where it was last year. When you give us your original (or first master) 2" Tape-To-Film-Transfer order, we promise two things:

1. The most faithful reproduction in Tape-To-Film-Transfers;
2. A superior picture on film.

The Deluxe General System III Tape-To-Film-Transfer process is the newest and the most advanced in the business. Our color electron beam recorder and AVR-1 combine to provide you with a Tape-To-Film capability second to none. And at the right price.

Now you can maintain maximum control of your Tape-To-Film-Transfers from beginning to end. At the same lab. Color correcting can be done on the color negative. Or when you order release prints. In either case, you control the look you want on the final film print.

If you like what you've done with your original tape, you'll like what you can do with the Deluxe General Tape-To-Film-Transfers of it.

For a demonstration of our new system, call today.

In-depth Local TV News is High Rating News.

In their constant battles for higher ratings, the television networks have come to recognize that *network* news gets higher ratings when backed by strong *local* news coverage. One of the major TV networks has even loaned out their research director to several affiliate stations to advise them on how to improve their local news operation. As far as the network is concerned, the local news operation is key!

Indeed, as many of the smaller independent stations and local affiliates have come to realize, on their own, ratings are generally up when TV stations present in-depth local news coverage, backed by mini-documentaries and public service reports that are geared to the needs, concerns and interests of the viewers in that local area.

Making it in the ratings.

Certainly television news is one area where being big or small doesn't count for much. Making it in the ratings really depends on a dedicated staff with sharp TV-journalistic perceptions, and a determination to make ambitious and imaginative use of the best available equipment. Within the limits of the usual budget restrictions.

And the best equipment on the market today, *at competitive prices*, is Cinema Products' line of CP-16 reflex and non-reflex sound cameras. Ideally suited for small crews and/or one-man-band operation!

Imaginative use of equipment.

Whatever your particular production needs — reflex or non-reflex, or both — the CP-16 and CP-16R are so versatile they lend themselves to the most daring and creative use your news cameramen can think of. You get all the freedom of movement you need . . . silent, dependable, no-nonsense "work-horse" kind of performance . . . plus all the features you would expect on 16mm cameras costing many thousands of dollars more. Without compromising quality.

The price is right!

So, whatever your budget, and whatever local news operation you have — network-owned, affiliate, or independent — Cinema Products gives you the choice of the most outstanding TV-newsfilm/documentary sound cameras. Reflex and non-reflex. *And the price is right!*

When You Win Five First Place Associated Press Awards For News You Must Be Doing Something Right!

NEWSCOPE 8
at 10:00 p.m.

WQAD
TELEVISION

Advertisement placed by WQAD-TV
in Moline's Daily Dispatch (May 20, 1974).

WQAD-TV, serving the Quad Cities (including Moline, Illinois), is typical of local affiliate stations, whose serious and imaginative treatment of local news has been rewarded by appreciably higher ratings.

At a recent semi-annual Illinois News Broadcasters Association convention, WQAD-TV picked up five Associated Press *first place* awards for TV-newsfilm coverage, all shot with the CP-16/A. Included in WQAD's award sweep was the Feature Photography award. On two other award categories there was an added notation: "Judges were moved to comment on excellent cinematography."

Also shot with the CP-16/A is WQAD's special on open heart surgery facilities in the Quad Cities — a documentary currently up for a National Heart Association award. Management at WQAD-TV is so pleased with the capabilities of the CP-16/A camera that it is planning to buy another one.

Shown below are two members of WQAD-TV's award-winning news team: News Director Jim King (left) and TV-Journalist/Cameraman Bob Wilford.
