

JOURNAL BINDERS

The binder shown in the accompanying illustration serves as a temporary transfer binder or as a permanent cover for a complete year's supply of JOURNALS. It is made of black crush fabrikoid, with lettering in gold. The binder is so constructed that each individual copy of the JOURNAL will lie flat as its pages are turned. The separate copies are held rigidly in place but may be removed or replaced at will in a few seconds.

These binders may be obtained by sending your order to the General Office of the Society, 33 West 42nd Street, New York, N. Y., accompanied by a remittance of two dollars. Your name and the volume number of the JOURNAL may be lettered in gold on embossed bars provided for the purpose at a charge of fifty cents each.
