

## CLASSIFIED INDEX, VOLUME XVIII

JANUARY TO JUNE, 1932

### **Acoustical Measurements.**

Measurements with a Reverberation Meter, V. L. CHRISLER and W. F. SNYDER, No. 4 (April), p. 479.

The Acoustics of Large Auditoriums, S. K. WOLF, No. 4 (April), p. 517.

### **Air Conditioning.**

Silica Gel Air Conditioning for Film Processing, E. C. HOLDEN, No. 4 (April), p. 471.

### **Amplifiers.**

A Method of Measuring Directly the Distortion in Audio Frequency Amplifier Systems, W. N. TUTTLE, No. 2 (February), p. 199.

Vacuum Tube and Photoelectric Tube Developments for Sound Picture Systems, M. J. KELLY, No. 6 (June), p. 761.

### **Apparatus, General.**

Thermionic Tube Control of Theater Lighting, BURT S. BURKE, No. 1 (January), p. 90.

A Method of Measuring Directly the Distortion in Audio Frequency Amplifier Systems, W. N. TUTTLE, No. 2 (February), p. 199.

Two Special Sensitometers, D. R. WHITE, No. 3 (March), p. 279.

Optical Instruments and Their Application in the Motion Picture Industry, I. L. NIXON, No. 3 (March), p. 304.

Western Electric Noiseless Recording, H. C. SILENT and J. G. FRAYNE, No. 5 (May), p. 551.

### **Architecture.**

Utilization of Desirable Seating Areas in Relation to Screen Shapes and Sizes and Theater Floor Inclinations, BEN SCHLANGER, No. 2 (February), p. 189.

### **Arcs, Projection.**

A Reflector Arc Lamp for Portable Projectors, H. H. STRONG, No. 6 (June), p. 752.

### **Color Photography.**

Some Color Problems, G. GEOGHEGAN, No. 5 (May), p. 619.

Report of the Color Committee, No. 6 (June), p. 792.

### **Committee Reports.**

Color, No. 6 (June), p. 792.

Journal and Progress Awards, No. 3 (March), p. 410.

Progress, No. 2 (February), p. 252.

Projection Practice, No. 1 (January), pp. 107 and 135.

Projection Practice, No. 4 (April), p. 539.

Projection Screens, No. 2 (February), p. 242.

- Projection Screens, No. 4 (April), p. 538.  
 Projection Theory, No. 1 (January), p. 113.  
 Sound, No. 3 (March), p. 410.  
 Sound, No. 4 (April), p. 526.  
 Standards and Nomenclature, No. 2 (February), p. 273.  
 Standards and Nomenclature, No. 3 (March), p. 409.  
 Studio Lighting, No. 5 (May), p. 666.  
 The Motion Picture Industry in Japan, M. RUOR, No. 5 (May), p. 628.  
 Ways and Means, No. 2 (February), p. 274.

#### **Composite Photography.**

- Special Process Technic, V. WALKER, No. 5 (May), p. 662.  
 Process Photography, G. A. CHAMBERS, No. 6 (June), p. 782.

#### **Defects in Film Resulting from Processing.**

- Directional Effects in Continuous Film Processing, J. CRABTREE, No. 2 (February), p. 207.

#### **Development of Motion Picture Film.**

- Directional Effects in Continuous Film Processing, J. CRABTREE, No. 2 (February), p. 207.  
 The Mechanism of Hypersensitization, B. H. CARROLL and D. HUBBARD, No. 5 (May), p. 600.  
 Time-and-Temperature vs. the Test System for Development of Motion Picture Negatives, W. LEAHY, No. 5 (May), p. 649.  
 Variation of Photographic Sensitivity with Different Light Sources, R. DAVIS and G. K. NEELAND, No. 6 (June), p. 732.  
 Variation of Photographic Sensitivity with Development Time, R. DAVIS and G. K. NEELAND, No. 6 (June), p. 742.

#### **Electrical Machinery and Equipment.**

- Thermionic Tube Control of Theater Lighting, BURT S. BURKE, No. 1 (January), p. 90.

#### **Emulsions, Hypersensitization of.**

- The Mechanism of Hypersensitization, B. H. CARROLL and D. HUBBARD, No. 5 (May), p. 600.

#### **Exhibition.**

- The European Film Market Then and Now, C. J. NORTH and N. D. GOLDEN, No. 4 (April), p. 442.

#### **Film, Photographic Characteristics.**

- Photographic Sensitometry, Part III, LOYD A. JONES, No. 1 (January), p. 54.  
 On the Assignment of Printing Exposure by Measurement of Negative Characteristics, CLIFTON TUTTLE, No. 2 (February), p. 172.  
 Directional Effects in Continuous Film Processing, J. CRABTREE, No. 2 (February), p. 207.  
 Photographic Sensitometry, Part IV, LOYD A. JONES, No. 3 (March), p. 324.

Gamma by Least Squares, D. R. WHITE, No. 5 (May), p. 584.

Variation of Photographic Sensitivity with Different Light Sources, R. DAVIS and G. K. NEELAND, No. 6 (June), p. 732.

Variation of Photographic Sensitivity with Development Time, R. DAVIS and G. K. NEELAND, No. 6 (June), p. 742.

#### **Fixing of Motion Picture Film.**

The Reducing Action of Fixing Baths on the Silver Image, H. D. RUSSELL and J. I. CRABTREE, No. 3 (March), p. 371.

#### **General.**

Sound Recording—From the Musician's Point of View, LEOPOLD STOKOWSKI, No. 2 (February), p. 164.

Résumé of the Proceedings of the Dresden International Photographic Congress, S. E. SHEPPARD, No. 2 (February), p. 232.

The Decibel in the Motion Picture Industry, V. C. HALL, No. 3 (March), p. 292.

The European Film Market—Then and Now, C. J. NORTH and N. D. GOLDEN, No. 4 (April), p. 442.

The Motion Picture Industry in Japan, M. RUOT, No. 5 (May), p. 628.

Sound Recording for Independent Productions, L. E. CLARK, No. 5 (May), p. 659.

#### **Home Motion Picture Equipment.**

A Portable Non-Intermittent Ciné Projector, No. 1 (January), p. 101.

Optics of Projectors for 16 Mm. Film, A. A. COOK, No. 4 (April), p. 461.

16 Mm. Sound Film Dimensions, R. P. MAY, No. 4 (April), p. 488.

The Animatophone—A New Type 16 Mm. Synchronous Disk Reproducer, A. F. VICTOR, No. 4 (April), p. 512.

#### **Hypersensitization.**

The Mechanism of Hypersensitization, B. H. CARROLL and D. HUBBARD, No. 5 (May), p. 600.

#### **Illumination in Photography.**

Stroboscopic and Slow-Motion Moving Pictures by Means of Intermittent Light, H. E. EDGERTON, No. 3 (March), p. 356.

Report of the Studio Lighting Committee, No. 5 (May), p. 666.

#### **Illumination, Projection.**

A Reflector Arc Lamp for Portable Projectors, H. H. STRONG, No. 6 (June), p. 752.

#### **Illumination, Sound Recorders.**

Lighting of Sound Films, LOUIS DUNOYER, No. 1 (January), p. 3.

#### **Illumination, Theater.**

Thermionic Tube Control of Theater Lighting, BURT S. BURKE, No. 1 (January), p. 90.

#### **Incandescent Lamps for Recording.**

Lighting of Sound Films, LOUIS DUNOYER, No. 1 (January), p. 3.

**Index.**

- Author Index, Volume XVIII, No. 6 (June), p. 803.  
Classified Index, Volume XVIII, No. 6 (June), p. 806.

**Laboratory Apparatus.**

- The Rapid Record Oscillograph in Sound Picture Studies, A. M. CURTIS, T. E. SHEA, and C. H. RUMPPEL, No. 1 (January), p. 39.  
A Method of Measuring Directly the Distortion in Audio Frequency Amplifier Systems, W. N. TUTTLE, No. 2 (February), p. 199.  
Directional Effects in Continuous Film Processing, J. CRABTREE, No. 2 (February), p. 207.  
Optical Instruments and Their Application in the Motion Picture Industry, I. L. NIXON, No. 3 (March), p. 304.  
Silica Gel Air Conditioning for Film Processing, E. C. HOLDEN, No. 4 (April), p. 471.  
A Machine for Printing Picture and Sound Simultaneously and Automatically, O. B. DEPUE, No. 5 (May), p. 643.

**Lenses.**

- Size of Image as a Guide to Depth of Focus in Cinematography, J. F. WESTERBERG, No. 5 (May), p. 655.

**Light Valves.**

- Lighting of Sound Films, LOUIS DUNOVER, No. 1 (January), p. 3.  
The Principles of the Light Valve, T. E. SHEA, W. HERRIOTT, and W. R. GOEHNER, No. 6 (June), p. 697.

**Loud Speakers.**

- Recent Developments in Theater Loud Speakers of the Directional Baffle Type, H. F. OLSON, No. 5 (May), p. 571.

**Medical Photography.**

- Advantages of Using 16 Mm. Supersensitive Panchromatic Film in Making Medical Motion Pictures, H. B. TUTTLE and R. P. SCHWARTZ, No. 5 (May), p. 609.

**Obituary.**

- George Eastman, No. 4, (April) p. 539; No. 5 (May), p. 685.  
Thomas A. Edison, No. 6 (June), p. 796.

**Optical Intermittents.**

- Mechanical Advantages of the Optical Intermittent Projector, J. L. SPENCE, No. 5 (May), p. 593.

**Optics.**

- Lighting of Sound Films, LOUIS DUNOVER, No. 1 (January), p. 3.  
Optics of Projectors for 16 Mm. Film, A. A. COOK, No. 4 (April), p. 461.  
Optical Instruments and Their Application in the Motion Picture Industry, I. L. NIXON, No. 3 (March), p. 304.  
Size of Image as a Guide to Depth of Focus in Cinematography, J. F. WESTERBERG, No. 5 (May), p. 655.

**Oscillograph.**

The Rapid Record Oscillograph in Sound Picture Studies, A. M. CURTIS, T. E. SHEA, and C. H. RUMPEL, No. 1 (January), p. 39.

**Perforation.**

Proposed Change in the Present Standards of 35 Mm. Film Perforations, A. S. HOWELL and J. A. DUBRAY, No. 4 (April), p. 503.

**Photoelectric Cells.**

Vacuum Tube and Photoelectric Tube Developments for Sound Picture Systems, M. J. KELLY, No. 6 (June), p. 761.

**Printers.**

A Machine for Printing Picture and Sound Simultaneously and Automatically, O. B. DEPUE, No. 5 (May), p. 643.

A Device for Printing Sound Films, R. V. WOOD, No. 6 (June), p. 788.

**Printing.**

On the Assignment of Printing Exposure by Measurement of Negative Characteristics, CLIFTON TUTTLE, No. 2 (February), p. 172.

**Process Photography.**

Special Process Technic, V. WALKER, No. 5 (May), p. 662.

Variation of Photographic Sensitivity with Different Light Sources, R. DAVIS and G. K. NEELAND, No. 6 (June), p. 73<sup>9</sup>.

Variation of Photographic Sensitivity with Development Time, R. DAVIS and G. K. NEELAND, No. 6 (June), p. 742.

Process Photography, G. A. CHAMBERS, No. 6 (June), p. 782.

**Processing.**

Directional Effects in Continuous Film Processing, J. CRABTREE, No. 2 (February), p. 207.

The Reducing Action of Fixing Baths on the Silver Image, H. D. RUSSELL and J. I. CRABTREE, No. 3 (March), p. 371.

**Progress.**

Organization of Progress Committee Work, No. 2 (February), p. 252.

The Motion Picture Industry in Japan, M. RUOT, No. 5 (May), p. 628.

**Projection, General Information.**

Report of the Projection Practice Committee, No. 1 (January), pp. 107 and 135.

Report of the Projection Theory Committee, No. 1 (January), p. 113.

Utilization of Desirable Seating Areas in Relation to Screen Shapes and Sizes and Theater Floor Inclinations, BEN SCHLANGER, No. 2 (February), p. 189.

Report of the Projection Screens Committee, No. 2 (February), p. 242.

Projection Screens Committee, No. 4 (April), p. 538.

Projection Practice Committee, No. 4 (April), p. 539.

Studio Projection and Reproduction Practice, J. O. AALBERG, No. 5 (May), p. 652.

**Projectors, Continuous.**

A Portable Non-Intermittent Ciné Projector, No. 1 (January), p. 101.

Mechanical Advantages of the Optical Intermittent Projector, J. L. SPENCE, No. 5 (May), p. 593.

**Projectors, Portable.**

A Portable Non-Intermittent Ciné Projector, No. 1 (January), p. 101.

The Animatophone—A New Type 16 Mm. Synchronous Disk Reproducer, A. F. VICTOR, No. 4 (April), p. 512.

**Projectors, Special Type.**

A Portable Non-Intermittent Ciné Projector, No. 1 (January), p. 101.

The Problem of Projecting Motion Pictures in Relief, H. E. IVES, No. 4 (April), p. 417.

Mechanical Advantages of the Optical Intermittent Projector, J. L. SPENCE, No. 5 (May), p. 593.

**Reduction.**

The Reducing Action of Fixing Baths on the Silver Image, H. D. RUSSELL and J. I. CRABTREE, No. 3 (March), p. 371.

**Reverberation of Auditoriums.**

Measurements with a Reverberation Meter, V. L. CHRISLER and W. F. SNYDER, No. 4 (April), p. 479.

The Acoustics of Large Auditoriums, S. K. WOLF, No. 4 (April), p. 517.

**Screens.**

Report of the Projection Screens Committee, No. 2 (February), p. 242.

Projection Screens Committee, No. 4 (April), p. 538.

**Selenophon.**

The Selenophon Sound Recording System, P. SCHROTT, No. 5 (May), p. 622.

**Sensitometry, Methods and Instruments.**

Photographic Sensitometry, Part III, LOYD A. JONES, No. 1 (January), p. 54.

Two Special Sensitometers, D. R. WHITE, No. 3 (March), p. 279.

Photographic Sensitometry, Part IV, LOYD A. JONES, No. 3 (March), p. 324.

Gamma by Least Squares, D. R. WHITE, No. 5 (May), p. 584.

**Sixteen Millimeter Equipment.**

Optics of Projectors for 16 Mm. Film, A. A. COOK, No. 4 (April), p. 461.

16 Mm. Sound Film Dimensions, R. P. MAY, No. 4 (April), p. 488.

The Animatophone—A New Type 16 Mm. Synchronous Disk Reproducer, A. F. VICTOR, No. 4 (April), p. 512.

Advantages of Using 16 Mm. Supersensitive Panchromatic Film in Making Medical Motion Pictures, H. B. TUTTLE and R. P. SCHWARTZ, No. 5 (May), p. 609.

**Sound as an Art.**

Sound Recording—From the Musician's Point of View, LEOPOLD STOKOWSKI, No. 2 (February), p. 164.

**Sound as a Science.**

The Decibel in the Motion Picture Industry, V. C. HALL, No. 3 (March), p. 292.  
Sound Committee, No. 3 (March), p. 410.

**Sound Installations in Theaters.**

Sound in the Los Angeles Theater—Los Angeles, Calif., D. M. COLE, No. 3 (March), p. 365.

Measurements with a Reverberation Meter, V. L. CHRISLER and W. F. SNYDER, No. 4 (April), p. 479.

The Acoustics of Large Auditoriums, S. K. WOLF, No. 4 (April), p. 517.

**Sound Recording, Disk.**

Vertical Sound Records: Recent Fundamental Advances in Mechanical Records on "Wax," H. A. FREDERICK, No. 2 (February), p. 141.

Victrolac Motion Picture Records, F. C. BARTON, No. 4 (April), p. 452.

**Sound Recording, Variable Density Method.**

Lighting of Sound Films, LOUIS DUNOYER, No. 1 (January), p. 3.

Western Electric Noiseless Recording, H. C. SILENT and J. G. FRAYNE, No. 5 (May), p. 551.

The Principles of the Light Valve, T. E. SHEA, W. HERRIOTT, and W. R. GOEHNER, No. 6 (June), p. 697.

**Sound Recording, Variable Width Method.**

Lighting of Sound Films, LOUIS DUNOYER, No. 1 (January), p. 3.

The Selenophon Sound Recording System, P. SCHROTT, No. 5 (May), p. 622.

**Sound Reproduction, Disk.**

Vertical Sound Records: Recent Fundamental Advances in Mechanical Records on "Wax," H. A. FREDERICK, No. 2 (February), p. 141.

Sound Recording—From the Musician's Point of View, LEOPOLD STOKOWSKI, No. 2 (February), p. 164.

Victrolac Motion Picture Records, F. C. BARTON, No. 4 (April), p. 452.

The Animatophone—A New Type 16 Mm. Synchronous Disk Reproducer, A. F. VICTOR, No. 4 (April), p. 512.

**Sound Reproduction, Film.**

16 Mm. Sound Film Dimensions, R. P. MAY, No. 4 (April), p. 488.

**Sound Reproduction, General Information concerning.**

Sound Recording—From the Musician's Point of View, LEOPOLD STOKOWSKI, No. 2 (February), p. 164.

The Decibel in the Motion Picture Industry, V. C. HALL, No. 3 (March), p. 292.

Recent Developments in Theater Loud Speakers of the Directional Baffle Type, H. F. OLSON, No. 5 (May), p. 571.

Sound Recording for Independent Productions, L. E. CLARK, No. 5 (May), p. 659.

**Sound Reproduction, Studio Installations.**

Studio Projection and Reproduction Practice, J. O. AALBERG, No. 5 (May), p. 652.

**Standardization.**

Proposed Change in the Present Standards of 35 Mm. Film Perforations, A. S. HOWELL and J. A. DUBRAY, No. 4 (April), p. 503.

Résumé of the Proceedings of the Dresden International Photographic Congress, S. E. SHEPPARD, No. 2 (February), p. 232.

**Standards and Nomenclature.**

Standards Committee, No. 2 (February), p. 273.

Standards Committee, No. 3 (March), p. 409.

**Stereoscopy.**

The Problem of Projecting Motion Pictures in Relief, H. E. IVES, No. 4 (April), p. 417.

**Stroboscope.**

Stroboscopic and Slow-Motion Moving Pictures by Means of Intermittent Light, H. E. EDGERTON, No. 3 (March), p. 356.

**Studio Equipment.**

Studio Projection and Reproduction Practice, J. O. AALBERG, No. 5 (May), p. 652.

Report of the Studio Lighting Committee, No. 5 (May), p. 666.

**Technical Motion Picture Photography.**

Stroboscopic and Slow-Motion Moving Pictures by Means of Intermittent Light, H. E. EDGERTON, No. 3 (March), p. 356.

**Theater Design.**

Utilization of Desirable Seating Areas in Relation to Screen Shapes and Sizes and Theater Floor Inclinations, BEN SCHLANGER, No. 2 (February), p. 189.

**Theater Design and Equipment.**

Sound in the Los Angeles Theater Los Angeles, Calif., D. M. COLE, No. 3 (March), p. 365.

**Trick Photography.**

Special Process Technic, V. WALKER, No. 5 (May), p. 662.

Process Photography, G. A. CHAMBERS, No. 6 (June), p. 782.

**Vacuum Tubes.**

Vacuum Tube and Photoelectric Tube Developments for Sound Picture Systems, M. J. KELLY, No. 6 (June), p. 761.
