FOR MICROPHONE MIXER CIRCUITS

The Type 652 Volume Control is a slide-wire type of attenuator combining compactness and low cost with excellent electrical and mechanical properties. It uses a ladder-type network which has a linear attenuation characteristic and nearly constant impedance. The noise level is extremely low.

Impedance: 50, 200, or 500 ohms.

Infinite attenuation, linear from 0 to 45 decibels.

Price: \$12.50.

For complete details, address the General Radio Company, Cambridge, Mass.

INSTRUMENTS OF PRECISION AND DEPENDABILITY

PAMPHLETS, BOOKLETS, AND CATALOGUES

Manufacturers of motion picture equipment and supplies are requested to send to the General Office of the Society copies of their descriptive pamphlets, booklets, and catalogues as issued. Notices of the issuance of this material will be published in the JOURNAL, advising the readers that the material may be obtained free of charge by addressing the manufacturers named. This editorial service has been established in order to acquaint readers of the JOURNAL with the commercial developments of the motion picture industry as quickly as they occur.
