**PROJECTION PRACTICE COMMITTEE**

The last meeting of the Projection Practice Committee, held at New York on January 24th, was perhaps the most outstanding meeting of the Committee since its organization. Twenty-one representatives of the major theater circuits attended, as also representatives of the National Carbon Company, for the purpose of discussing and analyzing the various problems attendant upon the new a-c. carbon arc projector lamp. The Committee plans to include, as part of its semi-annual report, a full presentation of the operating features of the lamp from the projectionist's point of view. The next meeting of the Committee will be held on February 28th.

**DEMONSTRATION OF TRANSMISSION AND REPRODUCTION IN  
AUDITORY PERSPECTIVE**

On January 30th, the members of the Atlantic Coast Section were the recipients of a kind invitation of the Bell Telephone Laboratories to attend a demonstration of transmission and reproduction in auditory perspective by Dr. Harvey Fletcher, at the Engineering Societies Building, New York, N. Y. Full details of the demonstration are being prepared by Dr. Fletcher, and will be published in the *JOURNAL* in the near future. The meeting was attended by approximately 700 members of the S. M. P. E. and the Acoustical Society of America.

The next meeting of the Atlantic Coast Section will be held on April 28th, at New York, N. Y.
