

We Offer You . . .

. . . the negative film that in 1934 again walked off with most of the honors . . . Eastman Super-Sensitive "Pan." We offer you the aid of the Brulatour and Eastman technical staffs that service this film. Both of these factors mean much to cameramen . . . as records prove. Take advantage of them for your next picture.

Many pictures are now being made with 100% carbon arc illumination.

The penetrating power of carbon arc illumination, the increased comfort it affords on the sound stage, its accurate color rendition and its unsurpassed photographic speed make the carbon arc a necessity for color production.

Its superiority for black and white photography is also gaining increasing recognition.
