At a meeting held on November 17th, at the Hotel Pennsylvania, New York, N. Y., Dr. L. A. Jones, of the Kodak Research Laboratories, Rochester, N. Y., presented a paper on the subject of "Inter-Relationships of Various Aspects of Color."

Despite the fact that this subject was not directly concerned with motion pictures, but dealt rather with the nomenclature and psychophysical aspects of color, the meeting was very well attended and the discussion following the presentation indicated an intense interest in the subject on the part of the 150 persons present.

Interesting meetings for the next two months have already been arranged, and announcements will be mailed to the membership in the near future.

Nominations of Officers and Managers of the Section for 1938 are as follows:

*Chairman:* G. Friedl, Jr.

### PACIFIC COAST SECTION

On November 9, 1937, members of the Pacific Coast Section were the guests of the Los Angeles Section of the American Institute of Electrical Engineers, at a meeting held at Trinity Auditorium in Los Angeles. The arrangement was made through the courtesy of the Southern Telephone Company. Dr. J. O. Perrine of the American Telephone and Telegraph Company presented a talk on the subject of "Waves, Words, and Wires," in which he described in a non-technical manner some of the latest developments in the art of telephone transmission and sound reproduction, illustrating the lecture with demonstration equipment. Among the effects demonstrated were those of electrical echo, singing, overloading of amplifiers, and noise, and how such detrimental features are eliminated or reduced. An additional demonstration of high-fidelity reproduction of sound and music, with a special multi-throated loud speaker was given.

Nominations of Officers and Managers of the Section for 1938 are as follows:

*Chairman:* J. O. Aalberg
