

CLASSIFIED INDEX, VOLUME XXXVI

JANUARY TO JUNE, 1941

Academy of Motion Picture Arts & Sciences

(See *Research Council*.)

Acoustics

Theater Acoustic Recommendations of the Academy Research Council Theater Standardization Committee, No. 3 (March), p. 267.

An Outline of the Work of the Academy Research Council Sub-Committee on Acoustical Characteristics, J. Durst, No. 3 (March), p. 283.

Acoustic Design Features of Studio Stages, Monitor Rooms, and Review Rooms, D. P. Loye, No. 6 (June), p. 593.

Amendments

(See *Constitution and By-Laws*.)

American Standards Association

American Standards and Their Place in the Motion Picture Industry, J. W. McNair, No. 2 (Feb.), p. 113.

ASA Committee Proposes Method for Determining Speed of Film, M. E. Russell, No. 2 (Feb.), p. 119.

Sectional Committee on Motion Pictures, No. 2 (Feb.), p. 213.

American Motion Picture Standards and Recommended Practices, No. 3 (March), p. 217.

Apparatus

Twentieth Century Camera and Accessories, D. B. Clarke and G. Laube, No. 1 (Jan.), p. 50.

Production-Quality Sound with Single-System Portable Equipment, D. Y. Bradshaw, No. 2 (Feb.), p. 180.

A New Treatment for the Prevention of Film Abrasion and Oil Mottle, R. H. Talbot, No. 2 (Feb.), p. 191.

Recent Developments in 8-Mm Copper-Coated High-Intensity Positive Carbons, W. W. Lozier, G. E. Cranch, and D. B. Joy, No. 2 (Feb.), p. 198.

A Molded Plastic Screen with Contoured Surface, R. O. Walker, No. 2 (Feb.), p. 202.

A Line Type of Microphone for Speech Pick-Up, L. J. Anderson, No. 3 (March), p. 309.

Scene-Slating Attachment for Motion Picture Cameras, F. C. Gilbert, No. 4 (April), p. 355.

Arcs

Recent Developments in 8-Mm Copper-Coated High-Intensity Positive Carbons, W. W. Lozier, G. E. Cranch, and D. B. Joy, No. 2 (Feb.), p. 198.

Report on Arc Lamp Noise Tests, from the Research Council, Academy of Motion Picture Arts and Sciences, No. 5 (May), p. 559.

Cameras

Twentieth Century Camera and Accessories, D. B. Clarke and G. Laube, No. 1 (Jan.), p. 50.

Scene-Slating Attachment for Motion Picture Cameras, F. C. Gilbert, No. 4 (April), p. 355.

Carbons

Recent Developments in 8-Mm Copper-Coated High-Intensity Positive Carbons, W. W. Lozier, G. E. Cranch, and D. B. Joy, No. 2 (Feb.), p. 198.

Cartoon Production

The New Walt Disney Studio, W. E. Garity and J. L. Ledeen, No. 1 (Jan.), p. 3.

Growing Pains, W. Disney, No. 1 (Jan.), p. 30.

Committees of the Society

No. 4 (April), p. 448.

Committee Reports

Standards, No. 3 (March), p. 260.

Constitution and By-Laws

Amendments to the By-Laws, No. 3 (March), p. 321.

Constitution and By-Laws of the Society (Complete), No. 4 (April), p. 461.

Proposed Amendments, No. 5 (May), p. 586.

Disk Recording

Stabilized Crystal Disk Recording Cutter, S. J. Begun, No. 6 (June), p. 666.

Editing

Motion Picture Editing, I. J. Wilkinson and W. H. Hamilton, No. 1 (Jan.), p. 101.

Emulsions

Some Observations on Latent Image Stability of Motion Picture Film, K. Famulener and E. Loessel, No. 4 (April), p. 374.

Exposure

Negative Exposure Control, No. 4 (April), p. 389.

Film, Mutilation in Use

A New Treatment for the Prevention of Film Abrasion and Oil Mottle, R. H. Talbot, No. 2 (Feb.), p. 191.

Film, Photographic Characteristics

ASA Committee Proposes Method for Determining Speed of Film, M. E. Russell, No. 2 (Feb.), p. 119.

Some Observations on Latent Image Stability of Motion Picture Film, K. Famulener and E. Loessel, No. 4 (April), p. 374.

Film Preservation

A New Treatment for the Prevention of Film Abrasion and Oil Mottle, R. H. Talbot, No. 2 (Feb.), p. 191.

General

The New Walt Disney Studio, W. E. Garity and J. L. Ledeen, No. 1 (Jan.), p. 3.
Growing Pains, W. Disney, No. 1 (Jan.), p. 30.
Pioneering in Talking Pictures, L. DeForest, No. 1 (Jan.), p. 41.
Motion Picture Editing, I. J. Wilkinson and W. H. Hamilton, No. 1 (Jan.), p. 101.
An Outline of the Work of the Academy Research Council Sub-Committee on Acoustical Characteristics, J. Durst, No. 3 (March), p. 283.
Twenty-Four Years of Service in the Cause of Better Projection, E. A. Williford, No. 3 (March), p. 294.
Amendments to the By-Laws, No. 3 (March), p. 321.
Hollywood's Low-Temperature Sound-Stage, R. Van Slyker, No. 4 (April), p. 403.
Theory vs. Practice, F. H. Richardson, No. 4 (April), p. 411.
Pioneering in the Talking Picture, W. E. Theisen, No. 4 (April), p. 415.
Officers and Governors of the Society, No. 4 (April), p. 445.
Committees of the Society, No. 4 (April), p. 448.
Constitution and By-Laws of the Society, No. 4 (April), p. 461.
Highlights of the Rochester Convention, Sagamore Hotel, Rochester, N. Y., May 5-8, 1941, No. 6 (June), p. 680.

Historical

Growing Pains, W. Disney, No. 1 (Jan.), p. 30.
Pioneering in Talking Pictures, L. DeForest, No. 1 (Jan.), p. 41.
American Standards and Their Place in the Motion Picture Industry, J. W. McNair, No. 2 (Feb.), p. 113.
Twenty-Four Years of Service in the Cause of Better Projection, E. A. Williford, No. 3 (March), p. 294.
Pioneering in the Talking Picture, W. E. Theisen, No. 4 (April), p. 415.

Illumination in Photography

Negative Exposure Control, D. Norwood, No. 4 (April), p. 389.

Illumination in Projection

Recent Developments in 8-Mm Copper-Coated High-Intensity Positive Carbons, W. W. Lozier, G. E. Cranch, and D. B. Joy, No. 2 (Feb.), p. 198.

Index

Author: No. 6 (June), p. 688.
Classified: No. 6 (June), p. 691.

Laboratory Equipment

Reduction of Development Sprocket-Hole Modulation, M. Leshing, T. Ingman, and K. Pier, No. 5 (May), p. 475.

Microphones

Line Microphones, H. F. Olson, No. 3 (March), p. 302.

A Line Type of Microphone for Speech Pick-Up, L. J. Anderson, No. 3 (March), p. 309.

Determination of Microphone Performance, F. L. Hopper and F. F. Romanow, No. 4 (April), p. 341.

General and Design Considerations of Low-Noise Microphones, A. L. Williams and H. G. Baerwald, No. 6 (June), p. 649.

Motors

Stability in Synchronous Motors, S. Read, Jr., and E. W. Kellogg, No. 5, (May), p. 514.

Noiseless Recording

Ground-Noise Reduction Systems, E. W. Kellogg, No. 2 (Feb.), p. 137.

Officers and Governors of the Society

On the reverse of the Contents Page of each issue of the JOURNAL.

Photos: No. 4 (April), p. 445.

Portable Equipment

Production-Quality Sound with Single-System Portable Equipment, D. Y. Bradshaw, No. 2 (Feb.), p. 180.

Printing

The Measurement of Photographic Printing Density, J. G. Frayne, No. 6 (June), p. 622.

Processing

Some Laboratory Problems in Processing 16-Mm Black-and-White and Color-Films, W. H. Offenhauser, Jr., No. 2 (Feb.), p. 172.

Reduction of Development Sprocket-Hole Modulation, M. Leshing, T. Ingman, and K. Pier, No. 5 (May), p. 475.

Note on the Keeping of Hydrogen Peroxide-Ammonia Hypo Eliminator Solutions, J. I. Crabtree, G. T. Eaton, and L. E. Muehler, No. 5 (May), p. 555.

Projection, General Information

Recent Developments in 8-Mm Copper-Coated High-Intensity Positive Carbons, W. W. Lozier, G. E. Cranch, and D. B. Joy, No. 2 (Feb.), p. 198.

A Molded Plastic Screen with Contoured Surface, R. O. Walker, No. 2 (Feb.), p. 202.

Twenty-Four Years of Service in the Cause of Better Projection, E. A. Williford, No. 3 (March), p. 294.

Research Council

Theater Acoustic Recommendations of the Academy Research Council Theater Standardization Committee, No. 3 (March), p. 267.

An Outline of the Work of the Academy Research Council Sub-Committee on Acoustical Characteristics, J. Durst, No. 3 (March), p. 283.

Report on Arc Lamp Noise Tests, from the Research Council, Academy of Motion Picture Arts and Sciences, No. 5 (May), p. 559.

Review Rooms

Acoustic Design Features of Studio Stages, Monitor Rooms, and Review Rooms, D. P. Loye, No. 6 (June), p. 593.

Screens

A Molded Plastic Screen with Contoured Surface, R. O. Walker, No. 2 (Feb.), p. 202.

Sectional Committee on Motion Pictures (ASA-Z22)

No. 2 (Feb.), p. 213.

American Motion Picture Standards and Recommended Practices, No. 3 (March), p. 217.

Sectional Committee on Photography (ASA-Z38)

ASA Committee Proposes Method for Determining Speed of Film, M. E. Russell, No. 2 (Feb.), p. 119.

Sixteen-Mm Motion Pictures

Some Laboratory Problems in Processing 16-Mm Black-and-White and Color-Films, W. H. Offenhauser, Jr., No. 2 (Feb.), p. 172.

Slating Devices

Twentieth-Century Camera and Accessories, D. B. Clarke and G. Laube, No. 1 (Jan.), p. 50.

Scene-Slating Attachment for Motion Picture Cameras, F. C. Gilbert, No. 4 (April), p. 355.

Sound Recording and Reproduction

Pioneering in Talking Pictures, L. DeForest, No. 1 (Jan.), p. 41.

Operation of the Variable-Intensity Recording System, C. W. Faulkner and C. N. Batsel, No. 2 (Feb.), p. 125.

Ground-Noise Reduction Systems, E. W. Kellogg, No. 2 (Feb.), p. 137.

Production-Quality Sound with Single-System Portable Equipment, D. Y. Bradshaw, No. 2 (Feb.), p. 180.

Theater Acoustic Recommendations of the Academy Research Council Theater Standardization Committee, No. 3 (March), p. 267.

Line Microphones, H. F. Olson, No. 3 (March), p. 302.

A Line Type of Microphone for Speech Pick-Up, L. J. Anderson, No. 3 (March), p. 309.

A 200-Mil Variable-Area Modulator, R. W. Benfer and G. T. Lorange, No. 4 (April), p. 331.

Determination of Microphone Performance, F. L. Hopper and F. F. Romanow, No. 4 (April), p. 341.

A Monochromatic Variable-Density Recording System, O. L. Dupy and J. K. Hilliard, No. 4 (April), p. 366.

A New Mirror Light-Modulator, W. R. Goehner, No. 5 (May), p. 497.

Scanning Theory, S. Sabaroff, No. 5 (May), p. 497.

Stability in Synchronous Motors, S. Read, Jr., and E. W. Kellogg, No. 5 (May), p. 514.

Acoustic Design Features of Studio Stages, Monitor Rooms, and Review Rooms, D. P. Loye, No. 6 (June), p. 593.

The Measurement of Photographic Printing Density, J. G. Frayne, No. 6 (June), p. 622.

An Improved Playback Horn Equipment, C. R. Daily, No. 6 (June), p. 636.

General and Design Considerations of Low-Noise Microphones, A. L. Williams and H. G. Baerwald, No. 6 (June), p. 649.

Stabilized Crystal Disk Recording Cutter, S. J. Begun, No. 6 (June), p. 666.

Standards Committee

Report of the SMPE Standards Committee, No. 3 (March), p. 260.

Erratum, No. 4 (April), p. 459.

Standardization

American Standards and Their Place in the Motion Picture Industry, J. W. McNair, No. 2 (Feb.), p. 113.

ASA Committee Proposes Method for Determining Speed of Film, M. E. Russell, No. 2 (Feb.), p. 119.

Sectional Committee on Motion Pictures (Z-22), No. 2 (Feb.), p. 213.

American Motion Picture Standards and Recommended Practices, No. 3 (March), p. 217.

Erratum, No. 4 (April), p. 459.

Studio Equipment

The New Walt Disney Studio, W. E. Garity and J. L. Ledeen, No. 1, (Jan.), p. 3.

Twentieth Century Camera and Accessories, D. B. Clarke and G. Laube, No. 1 (Jan.), p. 50.

Scene-Slating Attachment for Motion Picture Cameras, F. C. Gilbert, No. 4 (April), p. 355.

Hollywood's Low-Temperature Sound-Stage, R. Van Slyker, No. 4 (April), p. 403.

Report on Arc Lamp Noise Tests, from the Research Council, Academy of Motion Picture Arts and Sciences, No. 5 (May), p. 559.

Acoustic Design Features of Studio Stages, Monitor Rooms, and Review Rooms, D. P. Loye, No. 6 (June), p. 593.

An Improved Playback Horn Equipment, C. R. Daily, No. 6 (June), p. 636.

Synchronization

Stability in Synchronous Motors, S. Read, Jr., and E. W. Kellogg, No. 5 (May), p. 514.

Television

Problems in Television Image Resolution, C. F. Wolcott, No. 1 (Jan.), p. 65.

Televising the National Political Conventions of 1940, H. P. See, No. 1 (Jan.), p. 82.

The Photographic Aspects of Television Operations, H. R. Lubcke, No. 2 (Feb.), p. 185.

Theater Characteristics

Theater Acoustic Recommendations of the Academy Research Council Theater Standardization Committee, No. 3 (March), p. 267.

An Outline of the Work of the Academy Research Council Sub-Committee on Acoustical Characteristics, J. Durst, No. 3 (March), p. 283.
