Society Awards for 1951

THERE ARE NOW SIX formal Society Awards which are available for presentation annually to industry engineers who meet the qualifications briefly stated here.

Detailed reports of qualifications of all previous recipients of three of the awards are presented on pp. 641-643 of the JOURNAL for May, 1950, and illustrations showing both sides of two of the Society's medals appear on pp. 476-477 of the April, 1949, JOURNAL. Suggestions for possible candidates to be considered by the several award committees may be sent to

Society Headquarters or addressed directly to the individual chairmen.

FELLOW AWARD

Members in the Active grade who by their "... proficiency and contributions have attained outstanding rank among engineers or executives of the motion picture industry" may be proposed and considered as possible award nominees by the Fellow Award Committee. Such proposals will be received only from present Fellows of the Society and should be addressed to

Chairman, Earl I. Sponable, Fox Movietone, Inc., 460 West 54th Street, New York 19, N. Y.

HONORARY

The Honorary Membership Award is a distinction given to pioneers who have contributed inventions of basic importance to the industry or whose contributions have made possible better production, administration or utilization of motion pictures. Recommendations for the Honorary Membership Award may be submitted by any member of the Society and must be endorsed by at least five Fellows, who are required to set forth in writing their knowledge of the accomplishments which appear to justify presentation of the Award. Such recommendations must be addressed to the Honorary Membership Committee Chairman, Gordon A. Chambers, Motion Picture Film Dept., Eastman Kodak Company, 343 State St., Rochester 4, N.Y.

JOURNAL AWARD

The Journal Award is presented annually at the Fall Convention of the Society to the author of the most outstanding paper originally published in the JOURNAL of the Society during the preceding calendar year. Technical merit, originality and excellence of presentation are three major considerations. The authors of papers of nearly equivalent merit often receive Honorable Mention. The Journal Award Committee, appointed by the President is now under the Chairmanship of Mr. Paul Arnold, who will shortly be receiving from members of his Committee, their recommendations for the most outstanding paper for 1950. His address is: Ansco Corp., Binghamton, N.Y.

SAMUEL L. WARNER MEMORIAL AWARD

Each year the President appoints a Samuel L. Warner Memorial Award Committee to consider candidates for the Award. Preference is given to inventions or developments occurring in the last five years, and also to inventions or developments likely to have the widest and most beneficial effect on the quality of reproduced sound and picture. The Award is

made to an individual and may be based upon his contributions of the basic idea involved in the particular development being considered and also on his contributions toward the practical working out of the idea. The purpose of the Award is to encourage the development of new and improved methods or apparatus designed for sound on film motion pictures, including any step in the process. The present Chairman of the Committee is Glenn L. Dimmick, RCA Victor Division, Bldg. 10-4, Camden, N.J.

PROGRESS MEDAL AWARD

Written recommendations for candidates for the Progress Medal Award may be submitted by any member of the Society, giving in detail the accomplishments which appear to justify consideration. Qualifications should include invention, research, or development which has resulted in a significant advance in the development of motion picture technology and should be seconded in writing by any two Fellows or Active members of the Society, after which the recommendations must be filed with the Chairman of the Committee. For 1951, the Chairman is D. B. Joy, National Carbon Div., Union Carbide and Carbon Co., 30 E. 42 St., New York 17.

DAVID SARNOFF GOLD MEDAL

Most recent of the Society Awards is the David Sarnoff Gold Medal, offered by the Radio Corporation of America to a recipient to be selected by a committee appointed annually by the President of the Society. It will be presented annually at the Fall Convention to an individual "who has done outstanding work in some technical phase of the broad field of television or in any similar phase of theater television, whether in research, development, design, manufacture or operation."

The award will consist of a gold medal, a bronze replica and a certificate which states the accomplishments which justify its presentation. Its objective is "to encourage the development of new techniques, new methods and new equipment which hold promise for the continued improvement of television."
