Further information about these items can be obtained from the addresses given. As in the case of technical papers, the Society is not responsible for manufacturers' statements, and publication of news items does not constitute an endorsement.

A combination reel and film can is made in one unit called the Reel-Can by the manufacturers, Thalhammer Specialties, 10219 Eldora Ave., Sunland, Calif.

Made of metal, it is designed to save metal, money and time. There is a special film-threader with spring clamp to attach film to reel. The lid is constructed so that when it is fixed by spring lock and pins to the base with rim upwards the rim serves as the side of the reel. When the lid is inverted, with rim down, and fastened by the same spring lock and pins, it becomes the lid of the storage can.

A 200-ft, 8-mm Reel-Can costs \$1.50 postpaid. Other sizes in both 8-mm and 16-mm are planned.

The 1952 edition of the RCA Pocket Reference Book has been announced by the RCA Tube Dept., Harrison, N.J. It is also available from RCA distributors.

This year's is a revised edition, expanded to include information on products introduced during the past year, so that it now contains complete product listings and data on the characteristics, interchangeability and socket requirements of

more than 450 RCA receiving tubes, including kinescopes, with similar data on 75 dry batteries. Other sections of the book include: a selection guide for power, cathode-ray, photo and special tubes; a section on radio and television test equipment and trouble shooting; and a description of available technical literature on the various RCA products.
