The Hi-Speed Model S-5 Silver Tower is a new silver recovery equipment announced by Hi-Speed Equipment, Inc., affiliated with Artisan Metal Products, Inc., 73 Pond St., Boston (Waltham 54), Mass. The tower as normally installed requires 4 sq ft of floor space for the sump tank and head room of 8½ ft; the tower itself is approximately 15 in. in diameter × 40 in. high. The circulation pump may be placed in almost any position relative to the tower and tank. A complete system, including

tower, tank, circulation pump, circulation piping, electrifier and flow meter, is priced at \$3850.00.

The new Kodagraph Microprint Reader, Model A, is illustrated and described in a folder put out by the Industrial Sales Div., Eastman Kodak Co., Rochester 4, N.Y. The folder notes that as many as 60 standard book pages may be reproduced photographically in miniature on one side of a standard 3 × 5-in. library catalog size microprint card, or larger. It points out the salient features of the reader "which Kodak is now manufacturing in quantities to make the microprint idea a practical reality." Emphasis is put upon minimizing any sacrifice of comfort in reading from the translucent screen of the reader instead of from the printed page of a book.

The Pro-Tex Reel Clip is a simple and convenient device put out by the Pro-Tex Reel Band Co., 2108 Payne Ave., Cleveland 14, Ohio. It is usable on either tape reels or 16mm film reels and simply snaps on to hold the tape or film securely in place on the reel. A transparent index card holder comes attached to the clip.

CAMART PRODUCTS

★ **CAMART TV MIKE BOOM**
Rear handle for directional mike control. Sturdy 13' extension arm. Entire unit folds to fit in your car.
