

Former Society Presidents

The Society has a history of strong leadership. Those elected to the presidency had previously served the Society for many years in a variety of roles including other offices, membership on the Board of Governors, and active participation on the section level. These former presidents, though ser-

ving at different times, and coming from different industry segments and geographical areas, have had in common a strong personal commitment to the Society and a powerful sense of dedication to its ideals and important work. The following are photographs of all former Society presidents except

the second president, H.A. Campe (1919-21), whose picture was unavailable. The photographs of former Society presidents hang on the wall in the conference room at Society Headquarters in White Plains, N.Y.
