W. Wallace Lozier (1955)

W. Wallace Lozier

W. Wallace Lozier, an SMPTE Life Fellow and former member of the Board of Governors, died from a series of strokes on October 9, 1993. He was 87 years old.

Born in Humboldt, Ill., Lozier graduated from DePauw University with a B.S. degree in physics. In 1931 he received his Ph.D. in physics from the University of Minnesota. After teaching at Rensselaer Polytechnic Institute, he went to work for Union Carbide in 1936. There he devoted his career to the field of high-intensity light and arc physics. His work on lighting techniques and his contribution to color photography earned him an Oscar from the Academy of Motion Picture Arts and Sciences in 1955. Lozier was a Union Carbide Senior Research Fellow, and held

the position of assistant to the director of research at the time of his retirement in 1971.

Lozier joined the SMPE in 1939, and became a fellow in 1946. He served as Chairman of the Screen Brightness Committee from 1949 to 1955, during which time he organized two screen brightness symposiums. The first was held in May 1951 at the Society's 69th Conference in New York City. The papers presented were published in the *Journal* that September, and in the foreword Lozier noted that the Screen Brightness Committee "has long been interested in the problem of establishing a basis for determining preferred viewing conditions." The papers presented at the second symposium, held during the Society's 73rd Conference in Los Angeles, were published in the *Journal* in August 1953. In his foreword, Lozier expressed the hope that "these papers will be followed by many further studies on these and related subjects in order to enhance still further our knowledge of the ways of obtaining more effective presentation of motion pictures." Lozier also served on the Society's Board of Governors from 1955 to 1958.

He is survived by a son, Dr. John W. Lozier, and two grandsons.

Lawrence W. Davee

Lawrence W. Davee, an engineering consultant and Society member since 1929, has died. After receiving a B.S. degree in engineering from the University of Maine,

Davee worked for such companies as Bell Laboratories, where he did applied research in the area of carrier telephone frequencies; Fox Films, where he helped in the development of sound recording for films; and Motiograph, where he served as eastern sales manager. He joined Century Projector Corp. as sales manager and chief engineer in 1939, and was named president of the company 20 years later. He held that post until his retirement in 1974, the same year in which he was awarded a Life Fellowship in the SMPTE.

Dan Garrigan has died at the age of 45. An engineering consultant, Garrigan joined the Society in 1983. He received a B.S.E.E. from the Milwaukee School of Engineering in 1969. His previous employers include ROH Corp., where he held the position of sales manager; Westrex, where he served as a consultant engineer; RTS systems, where he was sales engineer; and Compact Video, where he was engineering manager.

Lenard E. Pearlman, president of Pearlman & Associates, has died at the age of 42. A member of SMPTE since 1981, Pearlman received a B.S. degree from Bradley University in 1973. His previous employers have included Editel/Div. of Columbia Pictures, where he was the General Manager; WRAV-TV, where he served as associate director; WTVP-TV, where he worked in the production department; and Northwest Audio, where he worked in the engineering department.

Errata

In the January 1994 *Journal*, p. 38, the name of LeRoy DeMarsh appeared in the wrong place in the caption. The correct identification is: (seated, L-R) Edwin Catmull, Robert J. Ringer, David Keighly, Stephen B. Cook, Hy Badler, Fung Fai Lam, Randall Hoffner; (standing, L-R) George T. Waters, Joseph Flaherty, LeRoy DeMarsh, Bob Elkind, Kenneth Parulski, C. Bradley Hunt, Glenn Kennel, Richard Leacock, Raymond Ravizza, and David Fibush.
