

Glue moon

Twenty five years ago Neil Armstrong made history by stepping on to the moon. Now Leitch has made history with technological achievements placing the company at the forefront of digital systems equipment. If we can't fly you to the moon, we *can* guarantee you out of this world performance from all our Digital Glue™ products.

Digital to Analog Encoders

Leitch pioneered monitoring encoders with the introduction of the VSM-6800. Its superior performance and features remain unsurpassed, giving four PAL/NTSC outputs as well as four relocked serial outputs from a serial 4:2:2 input. It is also zero SCH locked and can pass vertical interval signals such as VITC, teletext and closed captioning.

This is the proven industry leader for monitoring encoders.

The CES-3500 is a 'next generation' precision quality encoder.

It uses 12 bit signal processing and unique filter circuitry to provide exceptionally high resolution PAL or NTSC outputs from a component digital source. It has many matchless features such as automatic timing to an external reference, low frequency digital jitter removal and advanced sync outputs all of which are setting new standards for composite encoders. This is an exceptional product at a surprisingly low price, and, it's available now!

When it comes to talking digital you should be talking with Leitch, the industry's No.1 choice. For more information on these and associated digital products call us today.
