Projects

Department Manager

Within the Systems Integration Division, you will orchestrate the management of resources to execute complex, fully integrated broadcast systems. The ideal candidate will bring thorough project management experience and will be expected to further enhance project management techniques and new quality assurance programs. Your major responsibility will be to ensure project completion, both within schedule and budget. You will work in concert with our marketing and sales groups for future project budgeting. You will also prepare and update budgets and capital expenditures.

Requires 10+ years' experience in broadcast or production systems, as well as project management with 6 years' supervisory experience. Job Code: CCY-PDM

Proposal Manager

Utilize your sales and marketing expertise to oversee the development, coordination and preparation of sales proposals. This will include specifying strategy formulation and plan generation, as well as designing proposal formats and ensuring that guidelines meet customer and company needs. Requires 4+ years' broadcast or television production experience emphasizing operations. Excellent writing skills a must; familiarity with value-added sales processes desirable. Job Code: CCY-PM

Sr. Video Systems Design Engineers

Regular Full-time and Contract/Temporary

We're looking for very seasoned Engineers to work on designing large scale digital audio and video facilities. Candidates must be strong in system level engineering design, technical problem solving, team building and communications. Responsibilities will include the design of floor plans, equipment rack elevation layouts, and detailed signal flow construction diagrams. Fluency in Microsoft Excel for Windows is required; AutoCAD, MS Word and MS Access software knowledge a plus.

Requires 5+ years' experience in the design, operation, maintenance and testing of large scale state-of-the-art analog and serial digital audio and video production, as well as broadcast facilities. Job Code: CCY-VSD
