

Strategy for Success

In his President's Message, David George states:

"Active SMPTE membership can constitute a part of a personal, and even corporate, strategy for success. What can be accessed through the Society are several powerful, portable, permanent and professional information and application tools with which to address the challenges of the information age. Our knowledge base can be enhanced through personal involvement in SMPTE section, conference, and seminar events and through active membership."

"But gaining knowledge requires some active participation on your part too. We can only help provide useful tools and raw materials, and opportunities to access them. The active part relies on you."

Listed below are the 28 SMPTE Section Chairs with their contact information. Be in touch with them. Find out when, where, and what will be discussed at the next local section meeting in your area. Mark you calendar and make plans to attend!
