

Time is
running
out,
you make your play,
hit the air and
score.

Just another day
in the news game.

Like any sport, news is a competitive game demanding speed and accuracy. Put Leitch on your team and beat the competition to air. Leitch's digital news solutions let you record, edit and play to air faster and easier than ever before.

News can become history quicker than the flash of a red card. You need to play smarter and faster than the competition to win. Leitch's ASC VR300™ news server lets you lead the news game by giving you direct, real-time access to shared Fibre Channel storage. Your squad of producers, editors and journalists will experience the ultimate in team-work, simultaneously recording multiple feeds, editing a story, then instantly playing it to air. You'll suddenly be shaping entire stories you once had to leave in the field, and you'll have them on air before the competition rewinds their tapes.

It's all possible with NEWSFlash™, the world's first Windows NT-based integrated editing system designed specifically for news.

NEWSFlash™, a powerful new editing tool.

Add BrowseCutter™, and you've given your players all the equipment they need—your news journalists will be able to build rundowns, edit scripts, search wires and browse digital video, right from their computer desktops.

Like a solid game plan, Leitch's integrated news system keeps your team in championship form. All you have to do is put the ball in the net. **ASC**
