A "CLOSED" MPEG VIDEO SYSTEM MAY LOOK DECEPTIVELY ATTRACTIVE.

There's something fishy about a lot of DTV offerings. Their closed, proprietary technology simply won't allow future flexibility. DiviCom's open MPEG solutions will.

We are the established leader in providing DTV solutions that are easily integrated with third party products to meet the changing needs of your customers. Our open solutions are scalable and modular. They give you the capability to enhance your existing services over time and deliver multiple video services. DiviCom's industry leading compression systems also deliver the highest quality signal, so you can better utilize available bandwidth.

If you don't like the idea of being forever hooked by an inflexible architecture, make DiviCom your DTV partner. To learn how our open solutions can lower your risk and protect your network investments, call us today or visit our website for more information.
