

SMPTE Directors for the Year 2000

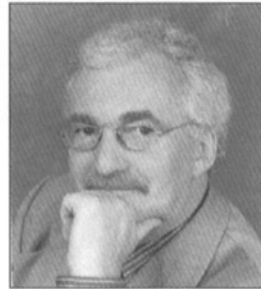

In addition to the Officers and Governors introduced in the December 1999 *Journal*, the Society is served by the following Directors.

Two Engineering Directors, one for Motion Pictures and one for Television, are appointed by the Engineering Vice-President. They provide guidance to the chairs of the Technology Committees to ensure that the conduct of the Society's engineering activities falls within the Society's Administrative Practices. To fulfill this role, they attend as many of the Technology Committee meetings as possible, and in cooperation with the Engineering Department at Headquarters support the committee and subgroup chairs with guidance on the proper conduct of committees, membership status, and voting procedure.
