Fax: (914) 761-3115
E-mail: mwaldman@smpte.org**

digital newsroom

News doesn't just break — it explodes

Hit the air instantly while your rivals crash and burn. Thanks to Leitch, now you can record multiple feeds, browse and edit as you record, and play back instantly with BrowseCutter™, Instant Online™ and NEWSFlash™ — our digital newsroom.

The instant news makes impact, you have to be ready to launch your crew into the action. The first one on air is reporting the news; everyone else is just reporting history. As every second passes, you're in danger of missing your target. Leitch's news server ensures that you never crash and burn by supplying direct, unrestricted access to our V-SAN — the Video Storage Area Network. Your crew can simultaneously record multiple feeds, edit complete packages and instantly play to air. In no time you'll be shaping stories that once remained up in the air. Your crew will be on the air before the competition loads its tapes. It's all possible with NEWSFlash™, the only 'in-the-server' Non-Linear Editor designed specifically for quick, hard news. And you can simultaneously attack with a fully armed squadron using BrowseCutter™ and Instant Online™, a complete set of ammunition allowing for browse, edit and instant story to rundown conformance of digital video and audio content right from the journalist's computer desktop. The sky's the limit with Leitch's integrated news system. Call 800-231-9673 for more information or visit our website at www.leitch.com.

Using NEWSFlash™ and Instant Online™ newsroom generals can coordinate with outside forces using the following compatible newsroom interfaces: ANN, AvStar, Comprompter, DCM, ENPS, Generation Technologies and Newstar
