

NEW SMPTE TEST MATERIAL

D-1 Format Digital Video Library Uncompressed Digital Video Test Sequences

Now available in 525/60 and 625/50 formats for subjective evaluation of digital equipment and systems

Prepared by the SMPTE Ad Hoc Group on Television Evaluation Materials

Contains digitally restored and repaired versions of the most widely used of the scenes specified in International Telecommunication Union Recommendation ITU-R BT.802-1, "Test pictures and sequences for subjective assessments of digital codecs conveying signals produced according to recommendation ITU-R BT.601." The 625/50 Version includes new scenes from Radio Televisione Italiano (RAI).

Completely described by Charles Fenimore in "Mastering and Archiving Uncompressed Digital Video Test Materials," *SMPTE Journal*, Volume 110, No. 10, October 2002, pp 726-735 and on the website at www.smpte.org/standards/pdf/Digital_Video_Test_Materials.pdf

.....TO ORDER.....
