

Contributors to Voluntary Capital Funds Program

The third list of contributions is published below. The first appeared in the April 1976 Journal and the second in August 1976. The present list is comprised of contributions received between 14 July and 22 November 1976. Names of additional contributors will continue to be published in future issues of the Journal. The Society is grateful for the practical assistance members are giving towards attaining its goal of retiring the indebtedness on the Headquarters building and thus reducing its overhead operating expense.

EDITING PROBLEMS COME IN 3 SIZES.

NOW THE SOLUTION DOES, TOO.

SMALL

Moviola M-84 2-Plate Editing Console. 16mm composite optical/magnetic picture head, 0-240 fps forward or reverse, digital counter. Masters to M-85 and M-77 with servo-tach system.

MEDIUM

Moviola M-85 4-Plate Editing Console. 16mm composite optical/magnetic picture head; interchangeable 16mm and 35mm sound modules for second set of plates; 0-240 fps forward or reverse, digital counter. Multi-track mixing capabilities. Masters to M-84 or M-77 with servo-tach system.

LARGE

Moviola M-77 6-Plate Editing Console. 16mm composite optical/magnetic picture head; two sets of sound heads (16 or 35mm interchangeable modules); 0-240 fps forward or reverse, digital counter. Extensive mixing capabilities. Masters to M-84 or M-85 with servo-tach system.

HOLLOW, TOO.

Now available with flicker-free hollow prism.

New Zeiss T/1.3 lenses— designed exclusively for Arriflex 16mm cameras.

The fastest matched set you can buy,
and the closest focusing. Designed for the
Arri bayonet mount. Zeiss quality.

Five T/1.3 lenses — three of them available now.

To take advantage of the newest emulsions and camera technology, our goal was to make the *best* matched set of 16mm lenses available. So we went to Zeiss.

New designs

The Zeiss designers had the unique advantage of *starting from the beginning*. No adapted 35mm designs. No compromises with back focal distance.

The hard way

A brand-new design, commissioned specifically for *one* film format and *one* brand of camera, takes more time and

costs more money to develop, naturally. But, given a good designer, you get a better lens.

Matched set

What we've got now is *three* lenses — 12mm, 16mm and 25mm. They're all f/1.2, T/1.3. Two more T/1.3s are in production — a 9.5mm and a 50mm.

Close focus

Minimum focusing distances: For the 12mm, 8 inches; for the 16mm, 10 inches; for the 25mm, 15 inches. They all stop down to f/11. And they're designed to deliver Zeiss quality at *every* stop, not just wide open.

For Arri only

Zeiss is making T/1.3 16mm lenses exclusively for us, in the steel Arri bayonet lock mount only. Usable with the 16S/B, the 16M—or the 16SR. The new emulsions, the 16SR camera and these lenses add up to a state-of-the-art 16mm *system*.

16SR and Zeiss—a camera system.

ARRI

Officers and Governors

Results of the 1976 election of the Society's officers and governors are:

President William D. Hedden
 Executive Vice-President .. Robert M. Smith
 Conference Vice-President
 Harry Teitelbaum
 Editorial Vice-President K. Blair Benson
 Secretary Richard S. O'Brien

Governors

New York Region Anthony H. Lind
 and Alvin J. Siegler
 Eastern Region L. Merle Thomas
 Central Region John M. Ehrenberg
 and John I. Newell
 Southern Region Edward M. Warnecke
 Western Region Edmund M. DiGiulio
 and Fred J. Scobey
 Canadian Region Maurice L. French

Joseph A. Flaherty New Treasurer

Joseph A. Flaherty, formerly Affairs Vice-President for Television, is the new SMPTE Treasurer having been elected by the Board of Governors to fill the post left vacant as a result of the election of Robert M. Smith to the office of Executive Vice-President. Frank Flemming was elected by the Board to the post of Affairs Vice-President for Television for the year 1977.

Brief biographical sketches of the officers and governors are given below.

William D. Hedden. Vice-Chairman of the Board, Calvin Communications, Inc., Kansas City. B.S. Chemical Engineering, Purdue University. Eastman Kodak Co. 1940-42; Photo-Science Laboratory, Naval Air Station, Anacostia 1942-46; Laboratory Superintendent, Calvin Co. 1946-59; Vice-President, Calvin Productions, Inc. 1959-71, responsible for technical supervision of production, printing, processing, sound recording, engineering and development of new equipment. SMPTE Fellow 1961; SMPTE Chicago Section Manager 1959-64; Governor, Central Region 1963, 1965-68; Sections Vice-President 1969-74; Executive Vice-President SMPTE 1975-76; Chairman, Voluntary Capital Funds Campaign.

Robert M. Smith. Executive Vice-President, Du Art Film Laboratories, Inc. Has been at Du Art for 23 years; prior to that Reconnaissance Officer, US Air Force. Attended Ohio State and Pace College, majoring in accounting. Elected three times to public office in New Jersey. Fellow of the SMPTE; Treasurer of SMPTE; Manager Education Services, New York Section; member Papers and Publications Advisory Committee, Financial Advisory Committee, Sustaining Membership Committee, Executive Committee, Laboratory Practice and Color Engineering Committees. Vice-President of the Assn. of Cinema & Video Laboratories.

Harry Teitelbaum. President, Hollywood Film Co., Hollywood. In film equipment supply business since 1939. Member Arrangements Committee various SMPTE Conferences, Los Angeles; SMPTE Fellow 1961; Conference

News Dept.: You can automatically charge
 5 Ikegami Battery Packs at one time.

Here's how: Just plug in (upto) 5 batteries, push the
 "Power" toggle switch to "On" and leave them alone.

Only one Frezzi Battery Sequencer with built-in charger does
 the job, automatically. In 12 hours (or less) totally unattended,
 the Frezzi Sequencer brings each Battery Pack in sequence to
 its full-charge state. Each Battery Pack then goes on trickle.
 Just unhook one (or more) & go.

For information call (N.J. 201) 427-1160 (N.Y.C. 212) 594-2294
