

Forthcoming Professional Meetings

The International Industrial Television Association's annual conference to be held 27-31 March in Kansas City will feature, among other attractions, workshops, equipment exhibits and a chance to view programs from other companies. Workshops, which will run at least two hours, will include sessions on lighting; script writing and instructional design; directing; audio; evaluating human performance; audience analysis and program evaluation; and basic television electronics. Further information is available from Ron Brown, International Offices, 26 South St., New Providence, NJ 07974.

The 1978 Toronto Super 8 Film Festival will be held 14-16 April at Harbourfront in Toronto. The program will include screenings, workshops, equipment display and a photographic exhibition. There will be several workshops on various aspects of super-8 filming including electronic production of super 8; art and super 8; super 8 on French television; feature production in super 8; super-8 animation and stop motion; and others. Further information is available from Sheila

Hill, Toronto Super Eight Film Festival, Box 7109, Postal Sta. A, Toronto, Ont., Canada M5W 1X8.

An important event to be held during Photokina (15-21 September in Cologne, Germany) will be a special meeting on technical-scientific photography and cinematography. The meeting will be sponsored by the Association for the Photographic Industry and the Cologne Trade Fair Corporation together with the Association of German Engineers. Subjects to be considered at the meeting will include photographic monitoring and quality controls; photographic processes for studying the environment; and photographic processes for saving energy. Further information about Photokina is available from the German-American Chamber of Commerce, 666 Fifth Ave., New York, NY 10019.

Calendar

16-18 January 1978
OSA Meeting on Integrated and Guided Wave

SMPTE Technical Conferences

3-4 February 1978
SMPTE Television Conference, Sheraton-Atlanta Hotel, Atlanta, Ga. Info from SMPTE Headquarters.

29 October-3 November 1978
SMPTE Technical Conference and Equipment Exhibit, Americana Hotel, New York City. Info from SMPTE Headquarters.

Optics, Salt Lake City, Ut. Info from Optical Society of America, 2000 L St., N.W., Washington, DC 20036.

5-8 February 1978
Objectives of Pictorial Color Reproduction Conference, Williamsburg, Va. Info from Inter-Society Color Council, Inc., Office of Secretary, Fred W. Billmeyer, Jr., Rensselaer Polytechnic Institute, Troy, NY 12181.

7-9 February 1978
Conference on Laser and Electro-Optical Systems, Town and Country Hotel, San Diego, Calif. Info from Jarus W. Quinn, Executive Director, Optical Soc. of America, Suite 620, 2000 L St., N.W., Washington, DC 20036. (See *Journal*, p. 852, Nov. 1977.)

13-14 February 1978
Laser Technology, Seminar, Atlanta, Ga. Info from Heidi E. Kaplan, Dept. 14NR, New York

HMI FRESNELS

High intensity, daylight sources that are lightweight, portable and economical.

- Produce nearly four times the intensity of filament lamps. 85-102 lumens per watt.
- A complete range of lamps from 575W to 4000W.
- Ideal for location filming and television broadcasting—5600°K.
- Greatly reduced power consumption.
- Operate from standard AC power supplies.
- Short warm-up time and instant hot re-strike.

STRAND CENTURY
A COMPANY WITHIN THE RANK ORGANISATION

Strand Century Inc., 5432 West 102nd Street, Los Angeles, California, 90045, U.S.A., (213) 776-4600

Strand Century Inc., 20 Bushes Lane, Elmwood Park, New Jersey, 07407, U.S.A., (201) 791-7000, (212) 564-6910

Strand Century Limited, 6334 Viscount Road, Mississauga, Ontario, Canada, L4V 1H3, (416) 677-7130

THEATRICAL, TV, MOTION PICTURE,
ARCHITECTURAL LIGHTING AND CONTROLS.

IF YOU DO SINGLE-SYSTEM SOUND WORK, YOU SHOULD KNOW ABOUT THE WRE 1600.

Model 1600 Magnetic Transfer System

Model 600 Optical Sound Recorder

SUSTAINING
SMPTE
MEMBER

The 1600 is really three systems in one . . . a dubber, recorder, and a transfer system.

Here's a system that allows you the convenience of single-system sound shooting and the freedom of double-system editing, in either 16mm or S-8.

You can play back your original for a sound quality check. Transfer your original sound to full coat mag film. And you can transfer the master sound to your release prints. With the companion Model 600 you can make optical sound tracks (electro-printing, positive or negative).

The 1600 is available in just about any track and film

configuration for mag striped release film and full coat material in 16mm and S-8. And the transports are designed to handle originals and release prints without damage.

Some of the available options are; Pickup Record Electronics, High Speed operation, Multi-channel and combination units, Interlock and Sync/interlock motor drive systems.

For full information on the 1600 and how it can make your job a lot easier, call or write today.

STUNTMAN!

Introducing Plio-Magic®'s third generation reels — the new stuntmen of the film handling world. Tougher and more durable than any previous designs, these new Plio-Magic® reels have a patent-pending hub construction that reinforces the reel body for extra strength and eliminates openings that trap cleaning fluids. A case-hardened steel insert in the center of the hub prevents wear and damage from high speed rewinding. Two film slots, located at finger grooves, are easy to find and readily accessible. Footage, meter, and running-time markings appear on both sides of the reels which have also been fully balanced to prevent noise and vibration during operation. Every Plio-Magic® 16mm reel meets or exceeds American National Standards required by the SMPTE. PRC of America offers economical, light weight, color-coordinated cans and cases to complement their 16mm reels. For complete information, write or call the office nearest you.

PLIO-MAGIC®
