

Contributors to Voluntary Capital Funds Program

The sixth list of contributions is published below; the first appeared in the April 1976 Journal, the second in August 1976, the third in January 1977, the fourth in May 1977, and the fifth in October 1977. The present list is comprised of contributions received between 20 May 1977 and 7 December 1977. Names of additional contributors will continue to be published in future issues of the Journal. The Society is grateful for the practical assistance members are giving towards attaining its goal of retiring the indebtedness on the Headquarters building and thus reducing its overhead operating expense.

VTR to FILM MPL CHROMA 47

At MPL,
Being First Isn't Good Enough.

We were the first film lab with Teledyne Video-to-Film. But that's no reason for us to sit back and take it easy. We're always striving to get better. That's how we've earned a reputation over the last 20 years as front runners in high quality VTR transfer systems. We'll show you why MPL CHROMA 47 is synonymous with quality.

Send us your tape today!

MPL's Comprehensive Services Include:

PROCESSING: 7247 Color Negatives, B & W Reversal, B & W Neg/Pos, Color ECO and EF, Color Neg, Interneg/Pos, Reg. & Super 8 also

PRINTING: B & W Interneg/Pos, B & W Reversal, Color Interneg/Pos, Kodachrome Prints, Ektachrome Prints, Printing Masters, Reg. & Super 8 also

SOUND: Original Recording, Rerecording, Mixing, Interlock Screenings, Sound Optical Transfers, Music Libraries

PRODUCTION SERVICES: Editorial, Conforming A/B Rolls, Titling, Film Treatments, Film Lubrication, Scripting

SPECIAL SERVICES: Color or B & W Videotape to Film Transfers, 35 mm to 16 mm Optical Reductions, 16 mm Optical with Effects, 16 mm to 8 mm Reductions, Film Treatments

CINE-CRAFT LABORATORIES, 8764 Beverly Boulevard, West Hollywood, California 90048, (213) 652-7357

Exclusive from Cinema Products:

Our kind of ENG/EFP

The reliable MNC-71CP!

If you know our CP-16 — the 16mm sound camera that is recognized worldwide as the standard in TV-newsfilm — you know Cinema Products!

You know of our responsiveness to the needs and requirements of the working TV-newscameraman... our sensitivity to his input from the field.

And you know of our commitment to provide him with the most reliable, highest-quality, cost-efficient TV-news gathering tools: lightweight, rugged and dependable equipment, with a minimum of downtime.

We are therefore extremely pleased to introduce the all-new MNC-71CP — the only ENG camera that bears the Cinema Products logo.

A breakthrough in ENG camera design

Manufactured by NEC, Japan's largest manufacturer of broadcast equipment, the MNC-71CP is, without a doubt, the finest and most advanced camera of its class — specifically designed from its inception to be used both as a compact, lightweight, fully self-contained ENG

Lightweight and compact (no backpack), the MNC-71CP is ideally balanced for on-the-shoulder operation.

camera as well as a broadcast-quality, versatile field production camera (with sophisticated remote production control capabilities, such as the ability to balance the MNC-71CP to match the colorimetry of other cameras in the field or in the studio).

Optimum performance

Extensive use of LSI micro circuits developed uniquely by NEC dramatically reduces the number of individual components in the camera. As a result, the MNC-71CP is significantly more stable in performance, 7 to 14 times more reliable in circuit operation, as well as considerably lower in its power consumption.

MNC-71CP with 5" viewfinder, mounted on Universal 2030 fluid head tripod (equipped with double handles). Also shown: Remote Production Control Unit and Remote Control Panel ("Paint Box"), camera case and related accessories.

Logical functional design

Everything about the MNC-71CP has been designed from the ground up for simple operation and easy maintenance. It is therefore logically, and simply laid out in terms of control placement, fast set-up and registration, and accessibility of parts.

For example, merely opening the camera sideplates exposes all internal circuit boards without requiring the use of a module extender, and the removal of just six screws permits access to the pickup tubes for quick replacement even in the field.

Service and parts availability

Behind the MNC-71CP is Cinema Products' outstanding reputation for after-sales service. The same consistent and dependable backup we have always provided for our CP-16 line and Steadicam™ — an extensive dealer organization and full factory support.

camera...

Since NEC directly manufactures all circuit components for the camera, you are guaranteed a full supply of replacement parts for the life of the camera. And we will make these available anywhere in the United States within 24 hours!

Unprecedented 1-year warranty

So confident are we of the MNC-71CP and its reliable performance, that it is covered by the standard Cinema Products full one-year warranty (unprecedented in the broadcast industry!). And, there is no service charge ever for warranty work.

Available here and now

Make the most of your ENG dollar with the all-new MNC-71CP — the reliable ENG/EFP camera with reliable CP backup. What's more, it is available here and now to take care of your immediate needs.

Merely opening the sideplates of the MNC-71CP permits checking all internal circuits without using a module extender.

OUTSTANDING FEATURES & OPTIONS

- *High-transmittance prism optics (maximum aperture f/1.4).*
- *3-tube RGB system features Saticon® or Plumbicon® 2/3" tubes, as desired.*
- *Built-in linear matrix for high fidelity in tracking colors from high-to-low light levels.*
- *Three-position gain control: 6 to 12 dB additional gain for greater flexibility in boosting for extremely low light levels.*
- *Built-in, easy-to-use filter wheel arrangement.*
- *Automatic white and black balance circuits.*
- *Built-in microphone and intercom amplifiers.*
- *Signal-to-noise ratio: 51 dB.*
- *Complete accessibility of circuit boards and pickup tubes for easy maintenance.*
- *Fast set-up facility for converging the camera.*
- *Remote production control capabilities include the ability to balance the MNC-71CP to match the colorimetry of any number of cameras in the field and in the studio, as well as genlock, master pedestal control, servo-iris control, etc.*
- *A full range of options and accessories further enhances the MNC-71CP's capabilities as an outstanding ENG/field production camera for battery or AC operation.*
