

Biographical Note

Edward P. Bertero

Edward P. Bertero retired 31 December 1977 as Senior Staff Engineer in the NBC Engineering Technical Development Group. He had been with NBC for 45 years, having joined in 1932. In 1937 he became an apprentice engineer in the Operations Group of the Engineering Department. From 1939 to 1942 he was assigned to both the Field and Studio Groups.

During World War II, while on leave of absence from NBC, he served as an officer in the United States Naval Reserve. An Electronics Specialist, he was assigned to the South Pacific with the PT boat operation. In 1945 he returned to NBC, joining the Development Laboratory

Group to assist in the modernization program for improving field equipment.

A graduate of New York University with a BS degree in Electrical Engineering, in the early days of television he contributed to the development of optical, mechanical and electronic special effects for black-and-white and later for color television. He established operational use of test pattern transparencies in color television and prepared specifications for pre-selection of the various test patterns used in color television for live and film operation. Recognized as an authority on color television technology, he also developed operational procedure for color camera matching in studio and field operations.

A member of the SMPTE since 1955, he was made a Fellow in 1966. His services to the Society include membership on the Color and Television Committees. He also served as Chairman of the SMPTE Colorimetry Committee from 1968 to 1972. He remained a member of the Committee until the SMPTE Committee Reorganization. Upon retirement he served as a member of Working Groups on Camera Colorimetry, Color Monitor Colorimetry, and Color Monitor Specifications. His publications include "Camera Matching and Illumination Control for Color Television" in the Sept. 1956 *Journal*; "Color Television Camera Matching Techniques" in the Aug. 1963 *Journal*; and "Integration of Technical Facilities in Black-and-White and Color Television Programming" in the July 1966 *Journal*.

Bertero's retirement plans include extensive travel, primarily in the United States. When he is not traveling he will be pursuing his hobbies which include the restoration of vintage automobiles and (weather permitting) observational astronomy.

New Sustaining Members

M B I, Inc., 9025 Eton Ave., Suite B, Canoga Park, CA 91304 (213) 882-8451

M B I, Inc. is a manufacturer of edit film amplifiers for use with synchronizers. We also distribute the Steenbeck Editing equipment, Omega Recording and Dubbing equipment, the AVE projector, Film-O-Hand Systems' editing supplies and the Stellavox, 1/4-in tape recorder. A complete range of spare parts and service is available on product lines handled by M B I.

Merlin Engineering Works, 1880 Embarcadero Rd., Palo Alto, CA 94303 (415) 329-0198

Oft lauded in song and story, the legendary Merlin, a web-footed, string-saving Magician continues to merrily ply his craft as alchemist to the engineering arts in his unpretentious cave by the Great Fen.

Having earned modest renown as the inventor of "Magic Chests," with which one might revitalize show and tell engines injured at joust — be they instruments of the Clan of Camdenshire or devices from the Mighty Alexander of Redwood Forest — Merlin and his band of mongers routinely draw forth marvels through the creative forces of metal, lightning and other good stuff.

While 'tis true, show and tell engines with four heads receive particular attention, lesser devices abound and minstrel machines from inscrutable Edo are cleverly fashioned in transformation to do the bidding of those who smote the air to broadcast and others of good will.

Of great import to those who wish to call upon the mystical powers of Merlin, be they thought or deed, is the magic electric telephone, a remarkable device by which the fingers of the concerned trace the magic numbers, "800-227-1980", and lo — the voice and ear of Merlin appear without payment of toll or tithe.

Then too, the communicants may also receive *The Book* with handsomely illuminated pages describing all Magic Chests and other things, by taking advantage of the services of the post.
