

THE NETWORKS' CHOICE. (AND EVERYONE ELSE'S.)

At Camera Mart, we've been a leading equipment supplier to broadcasters and producers for years. We're no strangers to the 'instant' needs, unexpected calls, tough standards and difficult operating conditions that are often S.O.P. in this rough-and-tumble business. But you probably know that...at least, when it comes to film.

What you may *not* know is, for the past few years, we've been quietly doing the same in *video*! Testing and selecting the leading equipment for performance and reliability. And offering a wide selection of production and post-production components and packages—on rental, lease and purchase plans with our customary flexibility.

But don't take our word for it: talk to our customers. You'll see why so many people the industry depends on, depend on us.

40 years of excellence

VIDCOM (International Market for Videocommunications), Palais des Festivals, Cannes, France. Info from John E. Nathan or Lora Ballato, 30 Rockefeller Plaza, Suite 4535, New York, NY 10020. (See *Journal*, p. 520, July 1979.)

The GVG 3240 processor

Restores original composite video

everywhere it's used!

The new 3240 Video Processor system provides full sync and blanking regeneration with SC/H phased outputs that comply with RS170A standards.

Eight video controls, including video gain, chroma gain, burst phase, burst level, and soft and hard clips, provide complete control of your video signal.

To suit the individual user's needs, nine options are available, such as VIR and video AGC, linearity corrector, external reference, and remote controls.

The GVG 3240 gives absolute control needed for the cleanest pulse and video output. . .continuously recreated to highest broadcast standards.
