New 16mm Test Film Available from SMPTE

This SMPTE 16-PA test film is used to check out projector alignment and screen image quality.

SMPTE's new 16-PA test film helps you evaluate the performance of your 16mm projector for alignment and screen image quality. It is designed to provide the same degree of performance evaluation for professional 16mm projectors that has been available for 35mm projectors through SMPTE's well known 35-PA and 35-IQ films. The film, supplied in 100 ft. rolls in black and white, is produced as a camera original. This is an excellent tool for permitting the quantitative measurements of projector adjustments that affect a projector's visual image. This film is made in accordance with SMPTE Recommended Practice RP82-1978.

Order Today. Specify 16-PA

Price \$41.00
