

New Members

The following members have been added to the Society's rolls since the publication of the 1979 *SMPTE Directory for Members*. Also listed are those reported as deceased since then. The designations of grade are the same as those used in the *Directory*. An up-to-date list of the Sustaining Members appears on the outside back cover of each month's *Journal*. The members listed below complete the Society's rolls as of 1 June.

The Directory for Members shows the geographical membership distribution within each Section.

Honorary (H) Life Fellow (LF) Life Member (LM) Fellow (F)
Active (M) Associate (A) Student (S)

Deceased:

Kenneth J. Coleman (A) Vance Danford (M) Winton C. Hoch (F)
John C. Lakotas (M) Francis R. Orban (LM)

ECTOR
OF
OGRAPHY

WE'VE HUNG AROUND WITH SOME OF THE GREATEST

Spectra[®] Meters have been the favorite of Directors of Photography since the late 40's, when the original large hemisphere was designed to simulate three dimensional characteristics in a scene. The hemisphere eliminates the problems of extremes of light and dark encountered with reflected light measurements.

CINE SPECIAL[™]

Now, the Spectra Cine Special meter includes additional features you've requested to meet the critical exposure measuring needs of today's filmmakers. The f-stop meter is, of course, direct-reading, and frames per second are locked-in for your convenience.

Naturally, the Cine Special is still a direct-reading meter when used for reflected readings. And you have the traditional block scale calibrated in 1/3 stops, as well as a footcandle scale.

There's more, of course. Each feature of this meter is the result of over thirty years experience serving the needs of Directors of Photography. Put this history and experience to work for you!

LUMICON[™]

The Lumicon footcandle meter is the first choice of gaffers and lighting directors. Its clear, uncluttered scale shows readings in footcandles only. Rugged, accurate, and reliable, it is the perfect mate to the Cine Special.

Houston Fearless 76

still makes the best film processors.

The Advanced Colormaster is a prime example of our expertise.

During the past 25 years, Houston Fearless has made many major contributions to the film processing industry. But, the best is yet to come.

For starters, our expert technicians will assist fully in determining your processing requirements and then proceed to see that they're met. To the last detail. We'll also provide prompt maintenance or repair when necessary. And, replacement parts will always be readily available.

Call or write us today. You should be on our mailing list. We have some fascinating new material to send you.

PICTURE PERFECT!

Arriflex. Known for perfection wherever professional cinematography is practiced. Check the model that will make your next motion picture-perfect.

ARRIFLEX 16SR A completely new 16mm reflex design with motor built into camera base for better balance and silent running. Lightweight unit accepts 400' instant-change magazine; onboard or outboard batteries. Has video tap for optional simultaneous taping and/or monitoring, thru-lens meter, crystal control, optional variable speed, auto servo exposure, 5-way rotational finder, much more. 50/60 Hz, 24/25 fps.

ARRIFLEX 35BL Silent, shoulder-balanced 35 lets you shoot sync sound on location to eliminate looping! Accepts video eyepiece for thru-lens taping/monitoring. Brilliant finder image shows entire silent aperture to eliminate mirroring. Rear-mounted, quick-change 400' magazine. Hi-power battery drives 1600' of film per charge, even in cold weather. Crystal sync for 50/60 Hz, 24/25 fps.

ARRIFLEX SUPERSPEED LENSES BY ZEISS

New design for cinematographic perfection. Aspherical elements, floating element, up to six layers of coating... for incredible results with almost no flare and astonishing penetration. For 16mm order T1.3 in 12mm, 16mm and 25mm. For 35mm order T1.4 in 18mm, 25mm, 35mm, 50mm and 135mm.

All the Arri's and all their accessories are available for sales, rental or long-term lease at Camera Mart. The headquarters for professional equipment... with the personal attention and factory-authorized service that professionals appreciate. It's the place to go to perfect your pictures!

As Shown At The NAB Convention—SMPTE's First Video Test Tape.

The 3/4-Inch Video Tape Cassette For Receiver/Monitor Setup

This new video test tape is intended to verify that the video cassette playback system is operating normally, and to supply reference signals useful for adjusting operating controls on the receiver or monitor for its intended use.

SMPTE introduces its new test tape cassette for the subjective evaluation of receiver or monitor setup and for checking out the overall performance of video and audio derived from 3/4-inch Type A magnetic helical scan tape reproducers.

No test instruments are required.

A commentator describes each scene and what it is intended to check.

Each cassette comes in a case and is accompanied by a Wratten 47B blue filter (or equivalent) and an instruction sheet on tape usage.

Made in accordance with SMPTE Recommended Practice RP 96

Here's what this new and unique test cassette contains.

Video

- (a) A recorded seven-step gray scale signal.
- (b) A recorded color bar signal.
- (c) Closeups of female and male models for skin tone evaluation and general definition.
- (d) Selected indoor scenes showing samples of sky, architecture, and human models with outdoor illumination.
- (f) Patterns for Safe Action and Safe Title Areas.
- (g) A crosshatch pattern to check scanning linearity.
- (h) A dot pattern to check picture tube convergence.
- (i) A full red field to check picture tube purity having the same luminance and chrominance as the red bar in a 75 percent color bar signal.

Audio

- (a) Commentary, recorded on audio channel 2, describing the scenes and calling attention to the reference material and its relationship to proper receiver/monitor set-up.
- (b) Orchestral music, recorded on audio channel 1, for evaluation of general audio reproduction.

Order Now.

**V3-RMS 3/4-inch Video Tape Cassette
For Receiver/Monitor Setup . . . \$70.00**

New CIRO 8PERF splicer:

Eight perforations,
two full 35mm frames

**Covers two 35mm frames
so the tape's edges are
at the frameline, invisible.**

Cleaner workprints for
client screenings with the only 35mm
frame-line tape splicer.

Old: tape edges visible on screen

New: tape edges invisible on screen

So the image doesn't
weave as the splices go through
the projector gate — and, with
the eight perforation format,
you don't see the tape's edges
go by on the screen.

**The
8PERF**
35mm Tape Splicer

from
CIRO
EQUIPMENT CORPORATION

CIRO Equipment Corporation;
6820 Romaine St., Hollywood,
Calif. 90038. (213) 467-1296

Like all CIRO splicers, the
8PERF makes its own
perforations in the splicing
tape and trims the edges auto-
matically. Perfect registration.

from your ENG camera—
specify Plumbicon TV camera tubes.**

As predicted, the Plumbicon $\frac{2}{3}$ -inch camera tube changed the entire course of broadcast journalism and helped make ENG the world's most important medium of information.

WORLD'S LARGEST SELLING TBC/FRAME SYNCHRONIZER.

SMALL WONDER.

ADDA's VW-1 Frame Synchronizer with infinite-window time base correction works digital wonders with television signals. Here's a frame synchronizer that prevents blanking problems, locks remote, network, EFP/ENG and satellite feeds to your station reference. Plus it offers freeze frame and freeze field capabilities.

Teamed with heterodyne color VTR's, the VW-1 time base correction goes all the way with an infinitely wide full-frame window. The VW-1 features adjustable velocity compensation and chrominance-to-luminance delay. Blanking is always within specifications. A remote control panel accessory is also available.

Viewers of the 1979 Tournament of Roses Parade and Super Bowl XIII telecasts witnessed brilliant performances by the VW-1.

Now, you too can see why our recognized low cost, compact size and unmatched combination of features have allowed us to place more units in operation than anyone else in the world. No one comes close. Small wonder.

Call or write for information or a demonstration. 1671 Dell Avenue, Campbell, California 95008 (408) 379-1500.

ADDA CORPORATION

GEVAERT

AGFA-GEVAERT

Communications without visuals is like a play with the actors behind the curtain.

Film is the medium capable of capturing a unique moment in time in all its richness and color. In full action. In pulsating reality. Because whatever the eye can see, film can record.

But that's not all.

It can capture moments that exist only in the imagination. Science fiction, mystery, fantasy. Film has become one of the arts.

For millions of people, it is an indispensable part of their daily lives. Whether at the cinema. On television. Or in their home projectors.

Agfa-Gevaert is a film pioneer. We grew up with it and we know its possibilities. We also know that while it may have matured,

it has not aged. Film will be as vibrant tomorrow as it is today.

Or show medical students new surgical techniques with it. Or make dramatic business presentations with it.

Whatever your professional large screen TV projection needs, put your money on the General Electric PJ5000 Projector. The PJ5000 pays off with a bright, life-like color picture—up to 20 feet wide. In either front or rear screen application.

Every viewer sees the same crisp, clean picture because the PJ5000 has unique inherent color registration. With rear projection (above), it can be used effectively in many applications with high room lighting. Viewers can take notes or follow outlines easily.

The odds are that the General Electric PJ5000 will meet your professional large screen television needs. For more information, call J. P. Gundersen, (315) 456-2562 today, or write Video Display Equipment Operation, General Electric Company, Electronics Park, 6 - 206, Syracuse, N.Y. 13221.

GENERAL  ELECTRIC

The General Electric PJ5000 projects professional large screen television of each race to Ontario Jockey Club patrons, Toronto.

If you thought the tape was good, wait till you see the film.

Our customers are perfectionists about their VTR to film transfers. So are we. With all due modesty, we think you'll be amazed at the clarity, brilliance and color fidelity of MPL Chroma 47. Send us any size tape, from 1/2 to 2 inches. Then get yourself a front-row seat.

1979 Membership Drive

The response to the SMPTE Membership Drive (see Directory for Members, April 1979, p. 159) is extremely gratifying.

For additional applications write to:
SMPTE Membership Dept.
862 Scarsdale Ave.
Scarsdale, NY 10583

Plaques and certificates will be awarded early in 1980.

RCA's all-new PM-85SL Dual Sprocketed Reproducer: quality and economy are only the beginning.

Say goodbye to time-worn conventional dual dubbers that have grown older but not much better.

Say hello to the all-new PM-85SL Series Dual Magnetic Reproducer—a fresh approach to function, design and packaging. The result: quality, economy, versatility and performance that make the servo-controlled PM-85SL an outstanding value for film and tape post-production sound processing. Consider these advantages:

- Servo-driven interchangeable sprockets for 16 and 35mm film.
- Automatic speed and equalization change for 16 and 35mm film.
- Built-in electronic interlock facility.
- Provision for adding erase and record facilities.
- Multi-track expansion—up to 12 tracks.
- Transfer capability at 2 times cine speed.
- Selectable 24/25 fps operation.
- All-new audio electronics.

The PM-85SL is the newest from RCA Photophone Systems, the people with the broadest line of sound-on-film and sound-for-tape systems. For information, write RCA, 2700 W. Olive Avenue, Burbank, CA. 91505, U.S.A.
