

We have the best 2 2/3" tube for your EJ camera... now.

tube talk

P-8160 Leddicons®

**The newest addition to
the successful family
of EEV Leddicon tubes.**

The P-8160 is directly interchangeable
with all existing lead oxide tubes.

Lowest lag and no blooming.
EEV Leddicons are rated the best for
these image tube characteristics.

EEV 2 2/3" Leddicons meet the same
high performance standards as the
1" and 30mm Leddicons, and are the
newest extension to EEV's hallmark
of high quality and reliability.

**The P-8160 is the best 2 2/3"
lead oxide tube available TODAY.**

Call or write today for complete details.

ference, William Penn Hotel, Pittsburgh, Penn.
Info from STC, 815 Fifteenth St., N.W., Wash-
ington, DC 20005.**

Have you seen any Steadicam action lately?

Evidence of Steadicam in action can be seen everywhere.

Current feature productions such as "The Shining," "Starting Over," "Fame," "Willie and Phil," "Altered States," "The Stunt Man," "Xanadu," "It's My Turn," "Wolfen," "Prince Of The City," "Four Friends," "Looking To Get Out," "True Confessions," "Kramer Vs. Kramer," "Blow Out," "Gloria," "Reds," "Silence Of The North," "The Idolmaker," "Only When I Laugh," "The First Deadly Sin," "The Chosen" — to mention a few — and quality TV programs such as "Little House On The Prairie," "The Miracle Worker," "The Hal Linden Special," "60 Minutes," as well as countless documentaries and commercials ... all vividly testify to the widespread use of Steadicam.

No question about it. Our Oscar-winning Steadicam film/video camera stabilizing system has ceased to be a novelty. It is now becoming a standard item in the filmmaker's basic arsenal of production tools. As elementary as a tripod or a dolly. But with far greater universal applications.

For Steadicam is an extremely practical all-purpose production tool of enormous versatility. Not at all restricted to running shots or esoteric special effects.

But far beyond its obvious practical advantages, Steadicam has generated an exciting new cinematic idiom that enhances the scene with a heightened sense of fluidity and intimate realism.

And, of course, our unique Steadicam system can be used — interchangeably — with most portable 35mm, 16mm and video cameras currently in professional use. Which is why so many independent filmmakers, studios and production companies prefer to own their Steadicam system.

We offer complete Steadicam/camera and accessories package deals to meet your every requirement. And our exciting "state-of-the-art" lease/upgrade program is custom-tailored to suit your financial needs.

Don't delay. Buy or lease your Steadicam now. And get all the benefits of tax write-offs and equipment ownership, as you enjoy the convenience and rewards of working with your own Steadicam system.

STEADICAM® is covered under U.S. Patent No. 4,017,168 and under foreign patents abroad.

Write for your free copy of our 8-page reprint of Garrett Brown's article in the August 1980 issue of American Cinematographer, describing the extensive use of Steadicam in the filming of Stanley Kubrick's "The Shining."

THE NETWORKS' CHOICE. (AND EVERYONE ELSE'S.)

At Camera Mart, we've been a leading equipment supplier to broadcasters and producers for years. We're no strangers to the 'instant' needs, unexpected calls, tough standards and difficult operating conditions that are often S.O.P. in this rough-and-tumble business. But you probably know that...at least, when it comes to film.

What you may *not* know is, for the past few years, we've been quietly doing the same in *video!* Testing and selecting the leading equipment for performance and reliability. And offering a wide selection of production and post-production components and packages—on rental, lease and purchase plans with our customary flexibility.

But don't take our word for it: talk to our customers. You'll see why so many people the industry depends on, depend on us.

Courses (Part 1 and Part 2) on Media Technology at MIT. Info from Director of the Summer Session, Room E19-356, Massachusetts Institute of Technology, Cambridge, MA 02139.

DID YOU KNOW...

Vital Industries manufactures the SQUEEZOOM... the only multiple channel video manipulation unit in use throughout the world which will accept non-synchronous signals without external synchronizers?

The SQUEEZOOM is the easiest VMU to operate in live production?

SQUEEZOOM has been in operation for 3 years with over 100 units delivered world-wide?

We can deliver a multi-channel SQUEEZOOM immediately?

Vital Industries also manufactures television production and master control switchers, automation systems and a full line of terminal equipment?

If you are interested in purchasing Vital equipment, write for PRICES and be surprised. Please include your title and name of company.

It's NAB showtime 12 months a year—
demonstrations by appointment.
