Miller fluid head.

A new microprocessor-based intelligent oscilloscope, the OS5100, has been announced by Gould Inc., Instruments Division, 35129 Curtis Blvd., Eastlake, OH 44094. The OS5100 has a bandwidth of 100 MHz, four-panel keyboard operation, combined alphanumeric and waveform display capabilities, and analog and digital interfaces that allow it to function as the heart of a complete measurement and analysis system. Typical measurements that can be made automatically include risetime, time and voltage differences, offset voltages, and period. The calculated results and all oscilloscope settings are displayed in alphanumeric form on the oscilloscope screen providing an accurate, unambiguous readout.
